

SOCIAL MEDIA LITERACY

WHAT AND WHERE ARE MIDDLE SCHOOLERS LEARNING ABOUT SOCIAL MEDIA?

In a mixed method study, we surveyed **229 school staff members** and **419 parents** from 4 school districts in the Northeast and interviewed 30 parents and 6 school staff members.

Most frequently discussed topics amongst educators:

49% of educators discussed how student technology use **interferes with sleep**

46% of educators discussed students **craving constant access to devices**

43% of educators discussed considering **how online posts affect others**

Most frequently discussed topics amongst parents:

With 92% of parents reporting discussing **stranger danger**, it was the most popular topic from our survey

90% of parents discuss **cyberbullying** and mean online behaviors

85% of parents warned their children of being influenced by **peer-induced risky behaviors** online (vaping, skipping school, alcohol, etc.)

FINDINGS

- Educators focused on the prevention of their students being victimized by their own addictive and self-regulatory behaviors while parents focused more on preventing their teens from unsafe or risk-taking online peer influences.
- The fact that educators and parents **focus on different aspects** of the digital wellbeing of the child could be turned into a strength of a home-school partnership that is not competing but **complementary** with one another.

Education and Social Factors María Luisa Zagalaz-Sánchez, Javier Cachón-Zagalaz, Daniil Shmatkov, María Angélica Castillo Cerda, Paula Queirós, 2023-12-22 **Mental Health, Social Media, and the Meta** Dov Greenbaum, Nazanin Alavi, 2024-11-11 One of the most damaging externalities from the recent pandemic has been the rise in mental health issues. Many psychiatric disorders have strong genetic components and although the extent of the genetic influence for many conditions has been extensively tested by genome wide association studies GWAS there remains much to be understood regarding the genetics of these health issues. Twin studies for example have found a relatively high rate of inheritance for depression and anxiety disorders. To better appreciate the role that genetics plays in these disorders it is useful to understand the extent to which other factors also contribute to the condition. Other major contributing factors to mental disorders are the environment and psychological factors. These environmental and psychological concerns have been further exacerbated by the growth of social media and the requirement especially for young adults and teenagers to always be on it. It is likely that the metaverse in whatever form it ultimately takes will further exacerbate these conditions. On the other hand, social media and the metaverse can be tools to help those suffering from mental health conditions. Online therapists and bots can provide frontline care to those who can't or won't go to an in person therapy session. AI can be employed to provide some forms of therapy in light of the growing demand for licensed therapists and the limited supply. **Social Media and Social Work** Megele, Claudia, Buzzi, Peter, 2020-07-15 The COVID 19 pandemic has shed fresh light on the ways that social media and digital technologies can be effectively harnessed to support relationship based social work practice. However it has also highlighted the complex risks, ethics and practical challenges that such technologies pose. This book helps practitioners and students navigate this complex terrain and explore and build upon its multiple opportunities. It uses real life examples to examine how practitioners can assess the impact of new technologies on their professional conduct and use them in a way that enhance public confidence and relationship based practice. The authors explore how digital technologies can support multiple areas of service including social work with children, families and adults, mental health, social work, youth, justice and working with online communities. They also consider regulatory questions and provide a roadmap for good practice.

Building Professional Nursing Communication Skills Jill Lawrence, Cheryl Perrin, Eleanor Kiernan, 2015-07-03 This essential resource guides nursing students through the concepts integral to successful communication for the duration of their degree. **Building a Professional Teaching Identity on Social Media** Janine S. Davis, 2016-09-26 As social media use explodes in popularity, teachers can now share resources and interact with a broad international audience of colleagues, scholars, students and the general public. Teachers use sites such as Twitter to develop and hone their professional identities and manage others' impressions of them and their work. This text draws on extensive research to provide guidance about teachers' use of social media for professional development and identity formation. A conceptual framework drawing on

Goffman's Theory of the Presentation of Self in Everyday Life and research into how users interact online informed the case studies of preservice teachers' experiences with social media. A secondary function of the book is to guide teachers through the process of conducting action research projects in their own classrooms. Use of social media involves more than just sharing links or scattered thoughts; savvy users consider a wide variety of methods and forms of interaction. This text shares research-based best practices for these forms of information sharing, including the effects of these practices on different audiences. Twitter and other forms of social media offer an easily accessible free mode of communication; however, while asking a question and obtaining answers from people all over the globe is exciting and while this process can be empowering for both the questioner and the responder, it can also be problematic as viewed from a quality control perspective. Is the information accurate? Does it reflect research-based best practices? What are some of the ways that teachers can and should form personae and identities on social media? What are the risks? This text chips away at these crucial questions.

International Handbook of Media Literacy Education Belinha S. De Abreu, Paul Mihailidis, Alice Y.L. Lee, Jad Melki, Julian McDougall, 2017-04-21. At the forefront in its field, this Handbook examines the theoretical, conceptual, pedagogical, and methodological development of media literacy education and research around the world. Building on traditional media literacy frameworks in critical analysis, evaluation, and assessment, it incorporates new literacies emerging around connective technologies, mobile platforms, and social networks. A global perspective rather than a Western-centric point of view is explicitly highlighted, with contributors from all continents to show the empirical research being done at the intersection of media education and engagement in daily life. Structured around five themes: Educational Interventions, Safeguarding Data and Online Privacy, Engagement in Civic Life, Media Creativity and Production, Digital Media Literacy, the volume as a whole emphasizes the competencies needed to engage in meaningful participation in digital culture. Social Media Marlynn M. Griffin, Cordelia Zinskie, 2021-09-01. Social media is a multi-faceted tool that has been used by educators and/or their students in ways both beneficial and detrimental. Despite the ubiquitous nature of this tool, there is much research still needed on the multitude of ways that social media impacts education. This book presents research on the influences of social media on education broadly construed. Specifically, the research included in this book is categorized into four broad areas: examining the educational influence of social media on youth and college students, professional development in content areas, higher education learning, and social justice and activism. Chapter authors emphasize the opportunities of social media use in education and provide recommendations for how to address challenges that may arise with social media integration into the teaching and learning setting. These authors also advocate for use of social media to grow and enhance professional interaction among educators, moving beyond the social aspect of these platforms to advocate for educational and societal change. Individuals working in K-12 schools, teacher education, teacher professional development, and higher education, including pharmacy, nursing, dental, and medical education, as well as those in other educational settings, can use

these findings to support and guide integration of social media into teaching and learning as well as their professional practice
