Education in an Age of Disruption Zhuplev, Anatoly, Koepp, Robert, 2021-10-22 Over the past two centuries the world's socio-economic progression has gone through profound paradigm changes unfolding along four major development stages. Higher education has been an important part of this process. The accelerated pace of technological, socio-economic, and business innovations, as well as ongoing fundamental changes in the real world, call for progress in pedagogy. While modern universities have adapted in various degrees through information platforms such as Blackboard or Brightspace, video conferencing, and other technological innovations, they still commonly rely on pedagogical ideas and concepts rooted in a thoroughly pre-modern era rooted in medieval times. *Global Trends, Dynamics and Imperatives for Strategic Development in Business Education in an Age of Disruption* explores the genesis of higher education and its contemporary structure and profile in major global regions and discusses key trends, dynamics, drivers, and developmental imperatives currently shaping business education. Covering topics such as business education, online education, and strategic development, this book is essential for teachers, managers, trainers, faculty, administrators, policymakers, researchers, academicians, and students involved in studies that include industrial, economic, social, urban, innovation, legal, and policy development. **Industrial and Organizational Psychology** Dr. Zulfiqar Ullah Siddiqui, *Industrial and Organizational I/O Psychology* is a specialized branch of psychology that applies psychological theories and principles to the workplace. It focuses on understanding human behavior in organizational settings to improve employee performance, job satisfaction, motivation, leadership, and overall organizational effectiveness. The industrial aspect deals with personnel-related issues like recruitment, selection, training, and performance appraisal, while the organizational side focuses on topics such as work motivation, team dynamics, leadership styles, job satisfaction, and organizational culture. The scientific study of human behavior in work settings and the application of psychological principles to organizations. Improve workplace productivity and employee well-being. Enhance organizational effectiveness. Job analysis and design. Employee motivation and engagement. Leadership and management styles. Work stress and coping strategies. Organizational culture and change. *Global Trends in Translator and Interpreter Training* Séverine Hubscher-Davidson, Michal Borodo, 2012-05-31 Analyzes topics and issues in translator and interpreter training focussing on areas that are new and underexplored yet crucial for translator/interpreter practice. **The Oxford Handbook of the History of Psychology: Global Perspectives** David B. Baker, 2012 The science and practice of psychology has evolved around the world on different trajectories and timelines yet with a convergence on the recognition of the need for a human science that can confront the challenges facing the world today. Few would argue that the standard narrative of the history of psychology has emphasized European and American traditions over others, but in today's global culture there is a greater need in psychology for international understanding. This volume describes the historical development of psychology in countries throughout the world. Contributors provide narratives that examine the political and socioeconomic forces that have shaped their nations' psychologies. Each unique story adds another element to our understanding of the history of psychology.

The chapters in this volume remind us that there are unique contexts and circumstances that influence the ways in which the science and practice of psychology are assimilated into our daily lives Making these contexts and circumstances explicit through historical research and writing provides some promise of greater international insight as well as a better understanding of the human condition

Disrupting Disruption David Kirp, Marjorie Wechsler, Madelyn Gardner, Titilayo Tinubu Ali, 2022 A compelling account of how US public schools can boost student achievement and close race and class opportunity gaps In recent years the constant drive to fix schools has bred cynicism resentment and at times unbridled anger In a field where camaraderie and collegial relationships are highly valued it is surprising that there is so little sustainable and focused collaboration among schools and school districts on how to improve Is disruption whether by inflicting a discipline and punish regime on our nation's schools or replacing them with charters or vouchers the only way forward In *Disrupting Disruption* David Kirp and his coauthors look closely at three seemingly ordinary school districts Union Oklahoma Union City New Jersey and Roanoke Virginia that have overcome the fragmentation isolation and lost learning opportunities of the public school system These school districts resemble others across the country where many students come from low income families Yet they have a relentless focus on developing and supporting teachers and engaged students constantly seeking ways to improve the use of data to enhance learning not punish partnerships with parents and local organizations and stable supportive leadership As the authors show each of these districts have consistently improved graduation rates and closed opportunity gap for Black and Latino students With vivid narratives buttressed by solid quantitative research *Disrupting Disruption* shows how every school district can improve and learn from one another
