14 November Maths Lit P2 Grade 11:

International Perspectives on Teaching and Learning for Mathematical Literacy, 2024-10-02 Mathematics plays an important role in today's world and is used in daily life more than is often appreciated. Mathematical literacy denotes the competence to deal with the mathematical issues of life in modern society. The underlying purpose of this book is to support the development of rich understandings and practices of how an education for mathematical literacy can be realised. The collected works emerging from several educational systems offer a fresh perspective on mathematical literacy and the chapters include practical examples that teachers, pre-service teachers and teacher educators might adapt to their own needs.

Non-Linear Perspectives on Teacher Development Kathryn J. Strom, Tammy Mills, Linda Abrams, 2023-03-21 Despite the multifaceted complexity of teaching, dominant perspectives conceptualize teacher development in linear, dualistic, transactional, human-centric ways. The authors in this book offer non-linear alternatives by drawing on a continuum of complex perspectives including CHAT complexity theory, actor network theory, indigenous studies, rhizomatics and posthuman neomaterialisms. The chapters included here illuminate how different ways of thinking can help us better examine how teachers learn relationally with human material and discursive elements and offer ways to understand the entangled nature of the relationship between that learning and what emerges in classroom instructional practice. They also present situated illustrations of what those entanglements or assemblages look like in the pre-service induction and in-service phases from early childhood to secondary settings and across multiple continents. Authors provide evidence that research on teacher development should focus on process as much if not more than product and show that complexity perspectives can support forward thinking, assets-based pedagogies. Methodologically, the chapters encourage conceptual creativity and expansion and support an argument for blurring theory, method and normalising methodological hybridity. Ultimately, this book provides conceptual, theoretical and methodological tools to understand current educational conditions in late capitalism and imagine otherwise. It was originally published as a special issue of the journal *Professional Development in Education*.
