current challenges faced by police including increased civil unrest negative public reactions and a biological siege brought about by the COVID 19 pandemic Posttraumatic Stress Disorder and depression are reviewed and how these two conditions have been shown to promote negative health issues such as cardiovascular disease and gastrointestinal disorders comorbid psychological conditions as well as suicide Resilience is also discussed and its role in ameliorating stress An overview of factors related to resilience is provided and some of the mechanisms that underpin resilience in police work are examined Additionally suggestions are made that may help police organizations foster resiliency in officers The final chapter asks the question Where do we go from here The chapter discusses current legislation that will help police deal with the problem of psychological and physical health and suicide Interventions discussed include the need for wellness programs reducing stress through the police organization peers support development the use of mindfulness as a stress reduction strategy PTSD mitigation and reducing the fatigue health effects of shift work
