Natasha Kersh,Hanna Toiviainen,Pirkko Pitkänen,George K. Zarifis,2021-04-21 This open access book sheds light on a range of complex interdependencies between adult education young adults in vulnerable situations and active citizenship Adult education has been increasingly recognized as a means to engage and re engage young adults and facilitate their life chances

and social inclusion thus contributing to an active citizenship within their societal contexts This collection of chapters dealing with issues of social inclusion of young people represents the first book to explicitly approach the complex interdependencies between adult education young adults in vulnerable situations and active citizenship from the European perspective Social exclusion disengagement and disaffection of young adults have been among the most significant concerns faced by EU member states over the last decade It has been increasingly recognised by a range of stakeholders that there is a growing number of young people suffering from the various effects of the unstable social economic and political situations affecting Europe and its neighbouring countries Young adults who experience different degrees of vulnerability are especially at risk of being excluded and marginalised Engaging young adults through adult education has been strongly related to addressing the specific needs and requirements that would facilitate their participation in social economic and civic political life in their country contexts Fostering the active citizenship of young people both directly and indirectly is an area where many AE programmes overlap and this has become a core approach to integration This book considers social economic and political dimensions of active citizenship encompassing the development of social competences and social capital civic and political participation and the skills related to the economy and labour market The cross national consideration of the notions of vulnerability inclusion and active citizenship underpins the complexity of translating these concepts into the national contexts of adult education programmes

volume International Encyclopaedia of Laws this practical analysis of sports law in Russia deals with the regulation of sports activity by both public authorities and private sports organizations The growing internationalization of sports inevitably increases the weight of global regulation yet each country maintains its own distinct regime of sports law and its own national and local sports organizations Sports law at a national or organizational level thus gains a growing relevance in comparative law The book describes and discusses both state created rules and autonomous self regulation regarding the variety of economic social commercial cultural and political aspects of sports activities Self regulation manifests itself in the form of by laws and encompasses organizational provisions disciplinary rules and rules of play However the trend towards more professionalism in sports and the growing economic social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities This form of regulation appears in a variety of legal areas including criminal law labour law commercial law tax law competition law and tort law and may vary following a particular type or sector of sport It is in this dual and overlapping context that such much publicized aspects as doping sponsoring and media and responsibility for injuries are legally measured This monograph fills a gap in the legal literature by giving academics practitioners sports organizations and policy makers access to sports law at this specific level Lawyers representing parties with interests in Russia will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative sports law *The Statesman's Yearbook 2017* Palgrave
