A Moral Economy of Whiteness Steve Garner, 2015-08-14 A Moral Economy of Whiteness presents a working model for understanding the main ways in which white UK people make race through talking about immigration in the twenty first century Based on extensive empirical interviews Steve Garner establishes four overlapping frames through which white English people understand immigration This comprises a narrative of unequal treatment where equality is a dirty word because it is seen as an agenda for redistributing resources to undeserving ethnic minorities non integrating migrants and unproductive white people Political correctness is seen as the ideological glue binding this unfair system People are thus retreating from Britishness into a more exclusive Englishness Garner explores the context of these understandings the dominance of neoliberal market rationales in which the State deprioritises anti discrimination work He concludes that these frames only make sense in a social world where Britain's imperial past has no bearing on the present and where racism in popular and media culture becomes purely a story of individual deviancy This book generates numerous international points of comparison that deepen our understanding of the backlash against multiculturalism in the West It will appeal to scholars and students of sociology social policy anthropology political science immigration multiculturalism nationalism and British studies

Marx in the Field Alessandra Mezzadri, 2021-02-15 Marx in the Field is a unique edited collection illustrating the relevance of the Marxian method to study contemporary capitalism and the global development process Essays in the collection bring Marx to the field in three ways They illustrate how Marxian categories can be concretely deployed for field research in the global economy they analyse how these categories may be adapted during fieldwork and they discuss data collection methods supporting Marxian analysis Crucially many of the contributions expand the scope of Marxian analysis by combining its insights with those of other intellectual traditions including radical feminisms critical realism and postcolonial studies The book defines the possibilities and challenges of fieldwork guided by Marxian analysis including those emerging from the COVID 19 pandemic The collection takes a global approach to the study of development and of contemporary capitalism While some essays focus on themes and geographical areas of long term concern for international development like informal or rural poverty and work across South Asia Southern and West Africa or South America others focus instead on actors benefitting from the development process like regional exporters larger farmers and traders or on unequal socio economic outcomes across richer and emerging economies and regions including Gulf countries North America Southern Europe or Post Soviet Central and Eastern Europe Some essays explore global processes cutting

across the world economy connecting multiple regions actors and inequalities While some of the contributions focus on classic Marxian tropes in the study of contemporary capitalism like class labour and working conditions agrarian change or global commodity chains and prices others aim at demonstrating the relevance of the Marxian method beyond its traditional boundaries for instance for exploring the interplays between food nutrition and poverty the links between social reproduction gender and homework the features of migration and refugees regimes tribal chieftaincy structures or prison labour or the dynamics structuring global surrogacy Overall through the analysis of an extremely varied set of concrete settings and cases this book illustrates the extraordinary insights we can gain by bringing Marx in the field

'Sisters in the Struggle' Kalpana Hiralal, 2023-02-10 Sisters in the struggle Women of Indian Origin in South Africa's Liberation Struggle 1900 1994 unveils an uncharted historical terrain highlighting the contributions of Indian women towards non racialism and equality and their experiences within diverse political parties therefore shifting the post apartheid liberation stories which have been dominated by the journey of the ANC to other political organisations who collectively played a significant role in South Africa's road to democracy In this book Hiralal presents a refreshing perspective of Indians particularly women as contributors and activists in the struggle The book elucidates that the struggle against apartheid was a collective endeavour among the oppressed races and not a one sided endeavour by the ANC The book thus examines the participation of Indian women against apartheid and colonialism within gendered and political frameworks

Why Learn History (When It's Already on Your Phone) Sam Wineburg, 2018-09-17 A look at how to teach history in the age of easily accessible but not always reliable information Let's start with two truths about our era that are so inescapable as to have become clichés We are surrounded by more readily available information than ever before And a huge percent of it is inaccurate Some of the bad info is well meaning but ignorant Some of it is deliberately deceptive All of it is pernicious With the Internet at our fingertips what's a teacher of history to do In *Why Learn History When It's Already on Your Phone* professor Sam Wineburg has the answers beginning with this We can't stick to the same old read the chapter answer the question snoozefest If we want to educate citizens who can separate fact from fake we have to equip them with new tools Historical thinking Wineburg shows has nothing to do with the ability to memorize facts Instead it's an orientation to the world that cultivates reasoned skepticism and counters our tendency to confirm our biases Wineburg lays out a mine filled landscape but one that with care attention and awareness we can learn to navigate The future of the past may rest on our screens But its fate rests in our hands Praise for *Why Learn History When It's Already on Your Phone* If every K 12 teacher of history and social studies read just three chapters of this book Crazy for History Changing History One Classroom at a Time and Why Google Can't Save Us the ensuing transformation of our populace would save our democracy James W Lowen author of *Lies My Teacher Told Me* and *Teaching What Really Happened* A sobering and urgent report from the leading expert on how American history is taught in the nation's schools A bracing edifying and vital book Jill Lepore New Yorker staff writer and author of *These*

Truths Wineburg is a true innovator who has thought more deeply about the relevance of history to the Internet and vice versa than any other scholar I know Anyone interested in the uses and abuses of history today has a duty to read this book

Niall Ferguson senior fellow Hoover Institution and author of *The Ascent of Money and Civilization* **Reading Feminist Theory** Susan Archer Mann,Ashly Suzanne Patterson,2016 Reading Feminist Theory From Modernity to Postmodernity interweaves classical and contemporary writings from the social sciences and the humanities to represent feminist thought from the late eighteenth century to the present Editors Susan Archer Mann and Ashly Suzanne Patterson pay close attention to the multiplicity and diversity of feminist voices visions and vantage points by race class gender sexuality and global location Along with more conventional forms of theorizing this anthology points to multiple sites of theory production both inside and outside of the academy and includes personal narratives poems short stories zines and even music lyrics Offering a truly global perspective the book devotes three chapters and more than thirty readings to the topics of colonialism imperialism and globalization It also provides extensive coverage of third wave feminism poststructuralism queer theory postcolonial theory and transnational feminisms *Mining in Latin America* Kalowatie Deonandan,Michael L. Dougherty,2016-07-15 The last two decades have witnessed a dramatic expansion and intensification of mineral resource exploitation and development across the global south especially in Latin America This shift has brought mining more visibly into global public debates and spurred a great deal of controversy and conflict This volume assembles new scholarship that provides critical perspectives on these issues The book marshals original empirical work from leading social scientists in a variety of disciplines to address a range of questions about the practices of mining companies on the ground the impacts of mining on host communities and the responses to mining from communities civil society and states The book further explores the global and international causes consequences and innovations of this new era of mining activity in Latin America Key issues include the role of Canadian mining companies and their investment in the region and to a lesser extent the role of Chinese mining capital Several chapters take a regional perspective while others are based on empirical data from specific countries including Bolivia Brazil El Salvador Guatemala and Peru **Male Suicide and Masculinity in 19th-century Britain** Lyndsay Galpin,2022-04-07 This book shows how interpretations of suicidal motives were guided by gendered expectations of behaviour and that these expectations were constructed to create meaning and understanding for family friends and witnesses Providing an insight into how people of this era understood suicidal behaviour and motives it challenges the assertion that suicide was seen as a distinctly feminine act and that men who took their own lives were feminized as a result Instead it shows that masculinity was understood in a more nuanced way than gender binaries allow and that a man s masculinity was measured against other men Focusing on four common narrative types the love suicide the unemployed suicide the suicide of the fraudster or speculator and the suicide of the dishonoured soldier it provides historical context to modern discussions about the crisis of masculinity and rising male suicide rates It reveals that narratives around

male suicides are not so different today as they were then and that our modern model of masculinity can be traced back to the 19th century
