2014 November Economics Papergauteng:

The Geography of South Africa Jasper Knight, Christian M. Rogerson, 2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa. It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa but also of relevance to other areas of the Global South. All chapters are original contributions providing a state of the art research baseline on key themes in physical human and environmental geography and in understanding the changing geographical landscapes of modern South Africa. These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world including issues of sustainable development and growth in the Global South. **Immigrant**

Entrepreneurship in Cities Cathy Yang Liu, 2020-08-01 This book draws on evidence from global cities around the world and explores various dimensions of immigrant entrepreneurship and urban development. It provides a substantive contribution to the existing literature in several ways. First of all, it pursues a comparative approach with case studies from both the global north and global south so as to broaden the theoretical framework in this area, especially as pertinent to emerging economies. Second, it covers multiple scales from local community place making to urban contexts of reception to transnational networks and connections. Third, it combines approaches and research methods from numerous disciplines investigating entry dynamics, trends and patterns, business performance, challenges and the impact of immigrant entrepreneurship in urban areas. Finally, it pays particular attention to current international experiences regarding urban policies on immigrant entrepreneurship. Given its scope, the book will be an enlightening read for anyone interested in immigration, entrepreneurship and urban development issues around the globe. As global cities around the world continue to attract both domestic migrants and international migrants to their bustling metropolises, immigrant entrepreneurship is emerging as an important urban phenomenon that calls for careful examination. From Chinatown in New York to Silicon Valley in San Francisco to Little Africa in Guangzhou, immigrant owned businesses are not only changing the business landscape in their host communities but also transforming the spatial, economic, social and cultural dynamics of cities and regions.

Dominance and Decline Susan Booysen, 2015-10-01 As Jacob Zuma moves into the twilight years of his presidencies of both the African National Congress (ANC) and of South Africa, this book takes stock of the Zuma led administration and its impact on the ANC. **Dominance and Decline: The ANC in the Time of Zuma** combines hard hitting arguments with astute analysis. Susan Booysen shows how the ANC has become centred on the personage of Zuma and that its defence of his extremely flawed leadership undermines the party's capacity to govern competently and to protect its long term future. Following on from her first book *The African National Congress and the Regeneration of Power* (2011), Booysen delves deeper into the four faces of power that characterise the ANC. Her principal argument is that the state is failing as the president's interests increasingly supersede those of party and state. Organisationally, the ANC has become a hegemon, riven

by factions as the internal blocs battle for core positions of power and control Meanwhile the Zuma controlled ANC has witnessed the implosion of the tripartite alliance and decimation of its youth women s and veterans leagues Electorally the leading party has been ceding ground to increasingly assertive opposition parties And on the policy front it is faltering through poor implementation and a regurgitation of old ideas As Zuma s replacements start competing and succession politics take shape Booysen considers whether the ANC will recover from the damage wrought under Zuma s reign and attain its former glory Ultimately she believes that while the damage is irrevocable the electorate may still reward the ANC for transcending the Zuma years This is a must have reference book on the development of the modern ANC With rigour and incisiveness Booysen offers scholars and researchers a coherent framework for considering future patterns in the ANC and its hold on political power *Promoting sustainable local economic development initiatives* Marius Venter,2022 This book endeavours to outline case studies that promote sustainable Local Economic Development LED initiatives It is generally believed that local governments are the foot soldiers of LED However this seems to be a myth as local governments in South Africa and elsewhere have not yet fulfilled this mandate and have been struggling for several years to implement LED initiatives The distinctive merit of this book lies in the way it combines the South African context with the wider international development context in ways that there is a flow of information and ideas both ways The book is an essential part of this sequence of ideas development and action at a critical time for strategic action directed at a sustainable future It showcases case studies and responses to the impacts of globalisation as a bridge between urban rural and institutional action and reveals avenues for local government leadership in communities research student engagement and wider interactions

Contemporary South Africa and the Political Economy of Regional Development Methembe Mdlalose,Isaac Khambule,Nene Ernest Khalema,2025-02-21 South Africa s struggle in balancing its domestic needs while playing a dynamic developmental role in the African region and global context exposes a complex web of relations shaped by its geostrategic location on the continent and the world and the staggering legacies of colonialism and apartheid As such understanding the complexities of the global economy and of South Africa s place in it is of great importance This book builds upon an existing body of literature which has demonstrated that while the post apartheid South African state has recast its nation building goals with advances having been made notably in the area of a stellar post apartheid constitution policy directives and democratic political integration economic integration and policy implementation presents a projection of captured interests where big business concerns are entrenched in the post apartheid state s apparent neo liberal turn The main focus of the book is to contextualise issues relating to three main trends in global discourses on development which are significant for South Africa and indeed for the study of the political economy of regional development in the country from the prism of South Africa as a global capitalist state These trends include the impact of globalisation regionalisation and the marginalisation of South Africa and indeed the African continent in the global economy thus unpacking the possible role that South Africa might

play in regional development This volume will be a valuable resource to academics researchers and students in the fields of regional studies economics and political theory as well as policymakers planners and local economic development practitioners

Development In Modern Africa Martin S. Shanguhya, Toyin Falola, 2019-10-08 Development in Modern Africa Past and Present Perspectives contributes to our understanding of Africa s experiences with the development process It does so by adopting a historical and contemporary analysis of this experience The book is set within the context of critiques on development in Africa that have yielded two general categories of analysis skepticism and pessimism While not overlooking the shortcomings of development the themes in the book express an optimistic view of Africa s development experiences highlighting elements that can be tapped into to enhance the condition of African populations and their states By using case studies from precolonial colonial and postcolonial Africa contributors to the volume demonstrate that human instincts to improve material social and spiritual words are universal They are not limited to the Western world which the term and process of development are typically associated with Before and after contact with the West Africans have actively created institutions and values that they have actively employed to improve individual and community lives This innovative spirit has motivated Africans to integrate or experiment with new values and structures challenges and solutions to human welfare that resulted from contact with colonialism and the postcolonial global community The book will be of interest to academics in the fields of history African studies and regional studies

Managing Sport Mega-Events Stephen Frawley, 2016-06-17 Managing Sport Mega Events explores global developments in the management of sport mega events Sport mega events such as the Olympic Games and the Football World Cup have been examined from a number of academic perspectives including history sociology politics urban planning and economics What is lacking however is a book which identifies and evaluates the current issues and complexities faced by those charged with the responsibility of managing these sport mega events This book fills the gap The book addresses three broad but interconnected themes First strategic matters are explored focusing on the rise of sport mega events the management of stakeholders and governance issues Second how organisers can best ensure the sustainable management of sport mega events is considered Third operational matters and related issues are examined including media management broadcast management venue management risk management marketing and sponsorship management The book draws on leading international sport management scholars each of whom has expertise in the organisation of sport mega events It makes a valuable contribution to the existing literature

Duality by Design Nuno Gil, Anne Stafford, Innocent Musonda, 2019-11-28 Using Africa as a context for research new conceptual framing is proposed to make sense of the challenges of designing effective organizations to pursue socio economic development

Economics and Climate Emergency Barry Gills, Jamie Morgan, 2022-08-22 This book explores a series of connected themes focused on the role economics and other influential forms of theory and thinking have played in creating the current predicament and the scope for alternatives and how they might be framed Thirty years have passed since the

inception of the United Nations Framework Convention on Climate Change UNFCCC and the beginning of policy on climate change Thirty wasted years To most politicians long term collective interest has been denominated in meaningless units of time a never and forever that has continually delayed action From complacency has come potential disaster and we are now living in a time of climate emergency and ecological breakdown The next decade is a pivotal period requiring fundamental change But numerous impediments remain Continual material energy and economic growth on a planetary scale are manifestly impossible and yet economic theory takes these as a given and political leadership and policy seem unwilling to accept brute reality Instead they offer a series of implausible commitments and pledges rooted in technofixes without addressing the fundamental drivers of the problems the world faces The edited volume explores the issues and offers a variety of ways to think through the problems at hand from postgrowth degrowth and social ecological economics to policy assemblage and transversalism The chapters in this book were originally published in the journal Globalizations

The Changing Space Economy of City-Regions Koech Cheruiyot, 2017-10-30 This book addresses the South African Space Economy and its stark disparities and dualisms through an assessment of the Gauteng City Region the largest economic agglomeration in the country and on a continent bedevilled by a myriad of development challenges The book's focus on understanding the overall character of Gauteng City Region's Space Economy through data mining analysis and mapping comprehensively supplements the Space Economy literature on the region It covers the disparities exacerbated by an overlay of apartheid planning ideology and top down regional development based on selective encouragement of manufacturing investments in growth points or poles and how implementation of past policies intended to cure these disparities have yielded mixed results This book further offers the Gauteng City Region as a microcosm of the national economy in the form of evident significant place based variations in the intensity and character of economic structure that on the one hand enjoys massive agglomeration economies while on the other has high levels of poverty and large numbers of people living below the Minimum Living Level This book should appeal to urban studies specialists economists and development studies researchers in the Global South
