Standards of English in Higher Education Neil Murray, 2016 A frank and critical appraisal of English language proficiency as a key issue in higher education today **Advanced Information Systems Engineering** Selmin Nurcan, Pnina Soffer, Marko Bajec, Johann Eder, 2016-05-26 This book constitutes the proceedings of the 28th International Conference on Advanced Information Systems Engineering CAiSE 2016 held in Ljubljana Slovenia in June 2016 The 35 papers presented in this volume were carefully reviewed and selected from 211 submissions The program included the following paper sessions Collaboration Business Process Modeling Innovation Gamification Mining and Business Process Performance Requirements Engineering Process Mining Conceptual Modeling Mining and Decision Support Cloud and Services Variability and Configuration Open Source Software and Business Process Management *Complex Problem Solving Beyond the Psychometric Approach* Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28 Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e g minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture

and understand what it is and how the different cognitive processes associated with it complement each other. Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holistic approach to investigating and theorizing about these abilities. The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS, DDM and CDC. This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another, what learning conditions result in transferable knowledge and skills, and how these features can be trained.

Educational Digital Transformation: New Technological Challenges for Competence

Development Julio Cabero Almenara, Carmen Llorente Cejudo, Antonio Palacios-Rodriguez, 2023-10-09. The COVID 19 pandemic has provided a unique opportunity to examine our understanding of the opportunities and challenges that ICTs offer to support the functioning of all aspects of education. The closure of educational institutions has forced a radical change in the practices of teachers and societies regarding the use of ICT to support teaching, learning, social relations and work in many sectors. In the training of digital skills, the instrumental mastery of ICT continues to outweigh the preparation of citizens to make constructive and safe use of technologies. After two decades of educational policies, we continue to reduce digital literacy to instrumental skills. That is, you do not learn why to use educational technologies and how or to be critical of their use. Education 4.0 seeks to develop and enhance the digital skills of students and teachers in digital teaching environments through the creation of a line of academic training programs for undergraduate, postgraduate and continuing education. This article collection welcomes contributions to improve training policies and practices in Educational Digital Transformation for educational development, strategies, activities, proposals for assessment and certification of skills.

Right to Education Act Kurian, Oommen C, Parvati, Pooja, A conscious neglect of school education in the initial decades of independent India is termed by Dreze and Sen (2013) as a home-grown folly. Public services like education are key to nurture participatory growth as well as to ensure that growth improves peoples

living conditions However India's highly privatised and compartmentalised education system largely unaccountable to the public offers very different opportunities for various social groups and perpetuates social inequalities instead of reducing them Three out of four children currently out of school in India are either Dalit 32.4% Muslim 25.7% or Adivasi 16.6% Enactment of the landmark RTE legislation has triggered significant improvements but evidence shows that quality has often been neglected While concerns regarding privatisation of education remain RTE Act offers a first step towards an educational system in India that offers access equity and inclusion of all children
