2014 November Motor Nquestion Paper:

Industrial Motion Control Dr. Hakan Gurocak, 2015-10-19 Motion control is widely used in all types of industries including packaging assembly textile paper printing food processing wood products machinery electronics and semiconductor manufacturing Industrial motion control applications use specialized equipment and require system design and integration To design such systems engineers need to be familiar with industrial motion control products be able to bring together control theory kinematics dynamics electronics simulation programming and machine design apply interdisciplinary knowledge and deal with practical application issues The book is intended to be an introduction to the topic for senior level undergraduate mechanical and electrical engineering students It should also be resource for system design engineers mechanical engineers electrical engineers project managers industrial engineers manufacturing engineers product managers field engineers and programmers in industry *Settlements at the Edge* Andrew Taylor, Dean B. Carson, Prescott C. Ensign, Lee Huskey, Rasmus Ole Rasmussen, 2016-09-30 *Settlements at the Edge* examines the evolution characteristics functions and shifting economic basis of settlements in sparsely populated areas of developed nations With a focus on demographic change the book features theoretical and applied cases which explore the interface between demography economy well being and the environment This book offers a comprehensive and insightful knowledge base for understanding the role of population in shaping the development and histories of northern sparsely populated areas of developed nations including Alaska USA Australia Canada Greenland Norway Russia Sweden Finland and other nations with territories within the Arctic Circle **Fault Diagnosis and Detection** Mustafa Demetgul, Muhammet Ünal, 2017-05-31 Mass production companies have become obliged to reduce their production costs and sell more products with lower profit margins in order to survive in competitive market conditions The complexity and automation level of machinery are continuously growing This development calls for some of the most critical issues that are reliability and dependability of automatic systems In the future machines will be monitored remotely and computer aided techniques will be employed to detect faults in the future and also there will be unmanned factories where machines and systems communicate to each other detect their own faults and can remotely intercept their faults The pioneer studies of such systems are fault diagnosis studies Thus we hope that this book will contribute to the literature in this regard Opening Credit Justin McGowan, Duncan Sankey, 2015-04-08 As a result of prevailing monetary conditions since the global financial crisis the world has witnessed unprecedented growth in global corporate credit markets Yet despite the trillions of dollars put to work in the debt capital markets corporate credit is still an unfamiliar concept to most investors compared to other asset classes such as equities and commodities Every red top newspaper and 24 hour news service is happy to report the latest twitch in the Dow FTSE or Stoxx indices but momentous moves in the iBoxx or iTraxx go unmentioned And whereas many a talking head is happy to pose as an equity analyst few feel comfortable venturing into the arcana of credit Yet the corporate credit market as the authors of this new book show is both

materially larger than its equity peer and has shown more attractive risk reward characteristics over the last 90 odd years In Opening Credit career credit professionals Justin McGowan and Duncan Sankey aim to redress this by drawing on their more than 50 years collective experience in the field to elucidate a practitioner s approach to corporate credit investment Whilst explaining the basics of traditional credit analysis and affirming its value McGowan and Sankey also caution against its shortcomings They demonstrate the need both to penetrate the veil of accounting to get to the economic reality behind the annuals and interim numbers and to analyse the individuals that drive them the key executives and board members They employ a range of cogent and easy to follow case studies to illustrate the value of their executive and governance led approach which places management front and centre in understanding corporate credit Opening Credit will appeal to all those seeking a better understanding of corporate credit including analysts looking to develop their skills fund managers especially those with an eye to SRI bankers IFAs financial journalists academics and students of finance **Green**

Transportation Logistics Harilaos N. Psaraftis,2015-07-13 This book examines the state of the art in green transportation logistics from the perspective of balancing environmental performance in the transportation supply chain while also satisfying traditional economic performance criteria Part of the book is drawn from the recently completed European Union project Super Green a three year project intended to promote the development of European freight corridors in an environmentally friendly manner Additional chapters cover both the methodological base and the application context of green transportation logistics Individual chapters look at the policy context the basics of transportation emissions Green Corridors basics the concept of TEN T Trans European Network Benchmarking of green corridors the potential role of ICT Information and Communication Technologies Green vehicle routing Reducing maritime CO2 emissions via market based measures and speed and route optimization Sulphur emissions Lifecycle emissions Green rail transportation Green air transportation Green inland navigation and possible areas for further research Throughout the book pursues the goal of win win solutions and analyzes the phenomenon of push down pop up wherein a change in one aspect of a problem can cause another troubling aspect to arise For example speed reduction in maritime transportation can reduce emissions and fuel costs but could require additional ships and could raise in transit inventory costs Or regulations to reduce sulphur emissions may ultimately increase CO2 elsewhere in the supply chain The book takes stock at the various tradeoffs that are at stake in the goal of greening the supply chain and looks at where balances can be struck **Turning the Mind's Eye Inward: The Interplay between**

Selective Attention and Working Memory Elger Abrahamse,Steve Majerus,Wim Fias,Jean-Philippe van Dijck,2016-01-21 Historically cognitive sciences have considered selective attention and working memory as largely separated cognitive functions That is selective attention as a concept is typically reserved for the processes that allow for the prioritization of specific sensory input while working memory entails more central structures for maintaining and operating on temporary mental representations However over the last decades various observations have been reported that question such sharp

distinction Most importantly information stored in working memory has been shown to modulate selective attention processing and vice versa At the theoretical level these observations are paralleled by an increasingly dominant focus on working memory as involving the attended part of long term memory with some positions considering that working memory is equivalent to selective attention turned to long term memory representations or internal selective attention This questions the existence of working memory as a dedicated cognitive function and raises the need for integrative accounts of working memory and attention The next step will be to explore the precise implications of attentional accounts of WM for the understanding of specific aspects and characteristics of WM such as serial order processing its modality specificity its capacity limitations its relation with executive functions as well as the nature of attentional mechanisms involved This research topic in Frontiers in Human Neuroscience aims at bringing together the latest insights and findings about the interplay between working memory and selective attention Language by mouth and by hand Iris Berent,Susan
