Risk Regulation in the Internal Market Maria Weimer, 2019-03-13 This book offers a topical inquiry into the legal and political limits of EU regulation in the field of risk and new technologies surrounded by techno scientific complexity uncertainty and societal contestation It uses agricultural biotechnology as a paradigmatic example to illustrate the complex intertwinement between environmental public health economic and social concerns in risk regulation Weimer analyses the drawbacks of the EU approach to agricultural biotechnology showing that its reductionism i e the narrow understanding of GMO risks as well as the exclusion of broader societal concerns related to environmental and social sustainability has undermined both the legitimacy and effectiveness of EU regulation in this area Resistance to this approach however has also triggered legal innovations prompting us to re think

EU internal market law including the way in which it manages the tensions between unity and diversity and between social and economic concerns This text offers fresh and original insights into how far the EU can go in harmonizing regulatory approaches to risk At the same time it proposes new ways of re thinking EU risk regulation to make it more responsive to different perspectives on risk and technology A unique feature of this book is that it contributes to various strains of scholarship including risk regulation internal market law public administration and studies of governance and regulation as well as connecting these themes to broader debates about the legitimacy of European integration and new ways of differentiated integration As a result it assists in re imagining the EU internal market and its regulation as a site of diversity

The Green Revolution Patrick Kilby, 2019-03-04 This book reviews the Green Revolution starting with its inception and development from the 1940s to the 1970s and leading to what is commonly referred to as a second Green Revolution in the 2000s Building on the historical assessment it draws insights for contemporary policy debates and demonstrates important lessons for the here and now Green Revolution refers to the technical measures employed to increase food particularly grain production based mainly on improved seed varieties for higher yields and pest resistance For it to be successful the Green Revolution often required land reform investments in irrigation and fertilizer supply that were not available to women and marginal farmers This book analyses three underlying principles that have guided green revolutions the political environment in which they were set how they contributed to both the successes and challenges the Green Revolution continues to face and the systemic institutional barriers for access to these agricultural production advances with a focus on how gender relations limit the inclusion of women even when they are the principle cultivators and farm managers The book draws on experiences in Mexico India and China examining government policy the role of the family farm and key issues around the inclusion of women In doing so this book connects the history of the Green Revolution with contemporary policy debates on the developing world particularly in relation to Africa and Asia around foreign aid and agricultural research It also specifically establishes that greater inclusivity for women and other marginalised farming communities will significantly enhance the effectiveness of these programs Interlinking themes of development policy gender and agricultural research this book will be of great interest to students and scholars of agricultural development food security and sustainable development as well as policymakers and practitioners working in international aid and agri food policies **Guide to Microforms in Print**, 1987

Мировая экономика и международные отношения, 2015 *Qanat* Dale Lightfoot, 2024-08-22 Qanats are ubiquitous yet unseen and a clever way to create streams where none exist in nature For 3 000 years they have made life possible in impossible places and still sustain life and livelihoods in many countries today After 30 years of field research Dale Lightfoot provides the first comprehensive study of the qanat and sheds new light on their unique locations and distribution their origins and history their ecology current status and use Qanats are remarkably engineered underground aqueducts using gravity to bring water to villages and towns where reliable flowing surface water is scarce or absent Although an ancient

technology more than 46 000 of them still flow around the world today with their sustainable nature making them a focus of renewed interest Richly illustrated with images and a series of original maps this is the most complete record to date of the locations and distribution of qanats worldwide including examples from the Middle East North Africa Europe Central Asia China India Mexico and South America
