Key Competences in Physics Teaching and Learning Tomasz Greczyło, Ewa Dębowska, 2016-09-22 This book presents a selection of the best contributions to GIREP EPEC 2015 the Conference of the International Research Group on Physics Teaching GIREP and the European Physical Society's Physics Education Division EPS PED It introduces readers interested in the field to the problem of identifying strategies and tools to improve physics teaching and learning so as to convey Key Competences and help students acquire them The main topic of the conference was Key Competences KC in physics teaching and learning in the form of knowledge skills and attitudes that are fundamental for every member of society Given the role of physics as a field strongly connected not only to digital competence but also to several other Key Competences this conference provided a forum for in depth discussions of related issues

2014 International Conference on Artificial Intelligence and Software Engineering(AISE2014) S. K. Chen, Altair Engineering Inc., California, USA, Y. H. Chang, Chihlee Institute of Technology, Taiwan, 2014-02-06 2014 International Conference on Artificial Intelligence and Software Engineering AISE2014 aims to provide a forum for accessing to the most up to date and authoritative knowledge from both Artificial Intelligence and Software Engineering AISE2014 features unique mixed topics of AI Algorithms Data Mining Knowledge based Systems Software Process and so on The goal of this conference is to bring researchers engineers and students to the areas of Artificial Intelligence and Software Engineering to share experiences and original research contributions on those topics Researchers and practitioners are invited to submit their contributions to AISE2014

Progress in Physics, vol. 3/2015 Dmitri Rabounski, Florentin Smarandache, Larissa Borissova, The Journal on Advanced Studies in Theoretical and Experimental Physics including Related Themes from Mathematics **Cotton Fiber: Physics, Chemistry and Biology** David D. Fang, 2018-11-09 Cotton fiber is the most important natural fiber used in the textile industry The physical structure and chemical compositions of cotton fibers have been extensively studied Newer high speed spinning instruments are being deployed around the world that demand longer stronger and finer fibers Consequently genetic improvement in fiber quality has been stressed With improvement in fiber quality has come the realization that further fiber improvement will require a better understanding of fiber development and biology As a consequence cotton fiber developmental biology genetics and genomics have become focal points in the cotton research community As the longest single celled plant hair cotton fiber has been used as an experiment model to study trichome initiation and elongation in plants This book provides a comprehensive update on cotton fiber physics chemistry and biology that form the three sections of the book In the physics section the physical structure of cotton fiber is first illustrated in great detail Then a suite of fiber properties and their measuring methods are described The pros and cons of each method are outlined New methods

to measure physical properties of single fiber and young developing fibers are included In the chemistry section the chemical compositions of cotton fibers are described in detail This knowledge is necessary for efficient modification of cotton fibers for better and broader utilization The advancement in cotton fiber modification using chemical and enzymatic methods opened new ways to utilize cotton fibers In the biology section the book first introduces the utilization of naturally occurring color cottons Color cottons possess unique attributes such as better fire retardant ability Advancement in understanding fiber color genetics and biochemical pathways and new utilization of color cottons are discussed Recent technological advancements in molecular biology and genomics have enabled us to study fiber development in great depth Many genes and quantitative trait loci related to fiber quality attributes have been identified and genetically mapped Some of these genes and QTLs are being used in breeding Progresses in cotton fiber improvement using breeding and biotechnology are discussed in the last chapter This book serves as a reference for researchers students processors and regulators who either conduct research in cotton fiber improvement or utilize cotton fibers
