Improving Primary Mathematics Education, Teaching and Learning Mellony Graven, Hamsa Venkat, 2017-01-19

This book focuses on how to improve the teaching and learning of primary level mathematics education within resource constrained contexts. It builds on two large numeracy projects within South Africa which speak to broader global concerns and highlight how research and development not only enables one to meet ethical imperatives but also explore how further interventions can be developed. Teacher and research communities must work together to create mutually beneficial relationships and establish a cohesive understanding of the requirements of primary mathematics education.

Computational Science and Its Applications - ICCSA 2014 Beniamino Murgante, Sanjay Misra, Ana Maria Alves Coutinho Rocha, Carmelo Torre, Jorge Gustavo Rocha, Maria Irene Falcão, David Taniar, Bernady O. Apduhan, Osvaldo Gervasi, 2014-07-03. The six volume set LNCS 8579-8584 constitutes the refereed proceedings of the 14th International Conference on Computational Science and Its Applications ICCSA 2014 held in Guimarães, Portugal, in June/July 2014. The 347 revised papers presented in 30 workshops and a special track were carefully reviewed and selected from 1167 initial submissions. The 289 papers presented in the workshops cover various areas in computational science ranging from computational science technologies to specific areas of computational science such as computational geometry and security.

Inside the Mathematics Class Uwe Gellert, Christine Knipping, Hauke Straehler-Pohl, 2018-09-26. This volume is a forward looking intersection of sociological perspectives on mathematics classrooms and socio-political perspectives on mathematics education. The first perspective has generated a substantial body of knowledge in the mathematics education. Interactionist research has deepened our understanding of interaction processes, socio-mathematical norms and the negotiation of meaning, generating a micro sociology or a micro ethnography of the mathematics classroom. More recently, socio-political perspectives on mathematics education interrelate educational practices in mathematics with macro social issues of social equity, class and race and with the policies that regulate institutionalized mathematics education. This book documents strings together and juxtaposes research that uses ethnographical classroom data to explain on the one hand how socio-political issues play out in the mathematics class. On the other hand, it illuminates how class, race etc. affect the micro sociology of the mathematics classroom. The volume advances the knowledge in the field by providing an empirical grounding of socio-political research on mathematics education and it extends the frame in which mathematical classroom cultures are conceived.

Beyond the Bubble Test Linda Darling-Hammond, Frank Adamson, 2014-06-16. Performance assessment is a hot topic in school systems and educators continue to analyze its costs, benefits and feasibility as a replacement for high stakes testing.
