Principles and Obstacles for Sharing Data from Environmental Health Research National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Roundtable on Environmental Health Sciences, Research, and Medicine, 2016-05-29 On March 19, 2014, the National Academies of Sciences, Engineering, and Medicine held a workshop on the topic of the sharing of data from environmental health research. Experts in the field of environmental health agree that there are benefits to sharing research data but questions remain regarding how to effectively make these data available. The sharing of data derived from human subjects, making them both transparent and accessible to others, raises a host of ethical, scientific and process questions that are not always present in other areas of science such as physics, geology or chemistry. The workshop participants explored key concerns, principles and obstacles to the responsible sharing of data used in support of environmental health research and policy making while focusing on protecting the privacy of human subjects and addressing the concerns of the research community. **Principles and Obstacles for Sharing Data from Environmental Health Research** summarizes the presentations and discussions from the workshop.
