Morris Goldstein

2014 November Economics Exams Paper2:

Banking's Final Exam Morris Goldstein, 2017-05-30 Spurred by the success of the first stress test of US banks toward the end of the global economic crisis in 2009 stress testing of large financial institutions has become the cornerstone of banking supervision worldwide The aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable In Banking's Final Exam one of the world's leading experts on banking regulation concludes that the tests administered on both sides of the Atlantic suffer from fundamental weaknesses leading to a false sense of reassurance about the safety and soundness of the banking system Some weaknesses can be corrected within the existing bank capital regime but others will require bold reforms including higher minimum capital requirements for the largest and most systemically important banks The banking industry is likely to resist these reforms but this book explains why their objections do not hold water

TERM STRUCTURE OF INTEREST RATE AND ECONOMIC ACTIVITIES: OECD CASE Assist. Prof. Dr. Erkan KARA, 2022-11-11 This study is dedicated to investigating the long run relation between interest rate spreads and economic activities which include industrial production inflation and unemployment rate in OECD countries over the period between 2005 and 2015 by using panel data analysis This study will use the latest panel data models that take structural breaks and cross sectional dependency into account Besides using panel data analysis on this issue this paper will also try to see the effect of new monetary policies that are taking place by major central banks on yield spread and economic activities especially industrial production As it is known that in the post financial crisis of 2008 period major central banks such as the Federal Reserve¹ The FED was the first central bank that started to implement new monetary policies just after the collapse of several large scale investment banks in the U S European Central Bank Bank of Japan and Bank of England have taken action to stimulate the world economy Henceforth not only these major central banks but also other economies started to lower their policy interest rates soon in conventional way These policies pushed interest rates almost to zero and since then the rates have remained very low due to lower output level and disinflationary fears

The UK Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern

Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government
