Michael Spector, Barbara B. Lockee, Marcus D. Childress, 2023-10-14 The multiple related fields encompassed by this Major Reference Work represent a convergence of issues and topics germane to the rapidly changing segments of knowledge and practice in educational communications and technology at all levels and around the globe There is no other comparable work that is designed not only to gather vital current and evolving information and understandings in these knowledge segments but also to be updated on a continuing basis in order to keep pace with the rapid changes taking place in the relevant fields The Handbook is composed of substantive 5 000 to 15 000 words peer reviewed entries that examine and explicate seminal facets of learning theory research and practice It provides a broad range of relevant topics including significant developments as well as innovative uses of technology that promote learning performance and instruction This work is aimed at researchers designers developers instructors and other professional practitioners **Interdisciplinary Approaches to Multilingualism** Suzanne Curtin, Mary Grantham O'Brien, Rahat Naqvi, 2015-07-16 This research topic stems from the Interdisciplinary Approaches to Multilingualism conference which was hosted by the Language Research Centre at the University of Calgary It was the first conference of its kind which brought together the work of researchers educators and policy makers in the areas of first and

second language acquisition from psycholinguistic and pedagogical perspectives The goal was to provide an opportunity for participants to engage with the implications of multilingualism from a range of perspectives including the effects of being bilingual from infancy to adulthood the process and benefits of learning multiple languages and the impact of multilingualism on society

Plant Glycobiology - a sweet world of lectins, glycoproteins, glycolipids and glycans Els J. M. Van Damme, Nausicaä Lannoo, Cécile Albenne, Elisabeth Jamet, 2015-02-12 Plants synthesize a wide variety of unique glycan structures which play essential roles during the life cycle of the plant Being omnipresent throughout the plant kingdom ranging from simple green algae to modern flowering plants glycans contribute to many diverse processes Glycans can function as structural components in the plant cell wall assist in the folding of nascent proteins act as signaling molecules in plant defense responses or ER stress pathways or serve within the energy metabolism of a plant In most cases glycans are attached to other macromolecules to form so called glycoconjugates e g glycoproteins proteoglycans and glycolipids but they can also be present as free entities residing in the plant cell Next to the broad complex set of glycans plants also evolved an elaborate collection of lectins or proteins with a lectin like domain which can recognize and bind to endogenous plants own or exogenous foreign glycans Though still poorly understood in plants the dynamic interactions between lectins and carbohydrate structures are suggested to be involved in gene transcription protein folding protein transport cell adhesion signaling as well as defense responses As such a complex and largely undetermined glycan interactome is established inside plant cells between cells and their surrounding matrix inside the extracellular matrix and even between organisms Studying the biological roles of plant glycans will enable to better understand plant development and physiology in order to fully exploit plants for food feed and production of pharmaceutical proteins In this Research Topic we want to provide a platform for articles describing the latest research perspectives and methodologies related to the fascinating world of plant glycobiology with a focus on following subjects

- 1 Identification and characterization of plant glycans their biosynthetic and degradation enzymes
- 2 Characterization of plant lectins and glycoproteins
- 3 Plant glycans in the plant s energy metabolism
- 4 Role of plant glycans in plant defense signaling
- 5 Use of plant lectins in pest control
- 6 Plant lectins as new tools in human medicine
- 7 Glyco engineering in plants

In Their Place Stephen Crossley, 2017-08-20 This book critiques how impoverished communities are represented by politicians the media academics and policy makers and how our understanding of these neighbourhoods is often misleadingly shaped by these stories The alleged behavioural failings of poor people have attracted a great deal of academic and political scrutiny Spatial inequalities are also well documented and poor neighbourhoods have been extensively researched However other spaces have been re imagined in different ways by politicians academics journalists and social reformers These imagined geographies include exoticised slums cities being reclaimed by nature the street and domestic spaces like the kitchen or even the bedroom In Their Place highlights how these spaces are represented and how these representations are deployed manipulating political and media discourses around the

individuals and communities who live there These distortions are often used to keep people in their place by making sure everyone knows where the poor belong This book will reorient those interested in human geography away from deprived neighbourhoods and back to the foundational spaces where political decisions and poverty are made in Britain today

Routledge Handbook of National and Regional Ocean Policies Biliانا Cicin-Sain, David Vanderzwaag, Miriam C.

Balgos, 2015-05-15 This comprehensive handbook prepared by leading ocean policy academics and practitioners from around the world presents in depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross cutting and integrated national and regional ocean policy All chapters follow a common framework for policy analysis While most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean such as shipping fishing oil and gas development in the last two decades the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated ecosystem based vision for the governance of ocean areas under their jurisdiction This includes goals and procedures to harmonize existing uses and laws to foster sustainable development of ocean areas to protect biodiversity and vulnerable resources and ecosystems and to coordinate the actions of the many government agencies that are typically involved in oceans affairs The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and the outcomes of the 1992 2002 and 2012 sustainable development summits The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated precautionary and anticipatory Overall the book provides a definitive state of the art review and analysis of national and regional ocean policies around the world *Frontiers in the Acquisition of*

Literacy Claire M. Fletcher-Flinn, 2015-09-28 Learning to read and to spell are two of the most important cultural skills that must be acquired by children and for that matter anyone learning a second language We are not born with an innate ability to read A reading system of mental representations that enables us to read must be formed in the brain Learning to read in alphabetic orthographies is the acquisition of such a system which links mental representations of visual symbols letters in print words with pre existing phonological sound and semantic comprehension cognitive systems for language Although spelling draws on the same representational knowledge base and is usually correlated with reading the acquisition processes involved are not quite the same Spelling requires the sequential production of letters in words and at beginning levels there may not be a full degree of integration of phonology with its representation by the orthography Reading on the other hand requires only the recognition of a word for pronunciation Hence spelling is more difficult than reading and learning to spell may necessitate more complete representations or more conscious access to them The learning processes that children use to acquire such cognitive systems in the brain and whether these same processes are universal across different languages and orthographies are central theoretical questions Most children learn to read and spell their language at the same time

thus the co ordination of these two facets of literacy acquisition needs explication as well as the effect of different teaching approaches on acquisition Lack of progress in either reading and or spelling is also a major issue of concern for parents and teachers necessitating a cross disciplinary approach to the problem encompassing major efforts from researchers in neuroscience cognitive science experimental psychology and education The purpose of this Research Topic is to summarize and review what has been accomplished so far and to further explore these general issues Contributions from different perspectives are welcomed and could include theoretical computational and empirical works that focus on the acquisition of literacy including cross orthographic research *Flipping Academic English Language Learning* Erik Voss,Ilka

Kostka,2019-06-17 This book draws on theory research and practice oriented literature to offer an introduction to flipped learning and offer busy instructors advice on how to flip their academic English language courses The chapters balance theoretical foundations practical applications and useful resources for developing materials The first half of this book defines flipped learning and academic English describes how it supports English language learning and explains the role of technology as well as issues with accountability and feedback The second half of the book then makes connections between the theoretical issues presented in the first three chapters and the practical applications in the following chapters which provide lesson descriptions and assessment ideas for language learning contexts with or without access to technology The book concludes with a list of tools and technologies for developing materials and activities as well as additional resources for professional development and further exploration of flipped English language learning What Makes a World-Class School and How We Can Get There James H. Stronge,Xianxuan Xu,2017-06-15 For years students in the United States have lagged behind students in many other countries on such measures of achievement as the PISA and TIMSS assessments In an increasingly globalized world such a gap is worrisome Armed with statistics examples and cautionary tales from Scandinavia to Japan James H Stronge and Xianxuan Xu have written a book that can help educators better prepare students and close that gap In *What Makes a World Class School and How We Can Get There* you will find Careful analysis of recent international assessment results what they mean and what can be done to improve them In depth profiles of high achieving education systems around the globe their histories their lessons learned and what they can teach educators and policymakers in the United States Strategies for aligning successful educational approaches from international systems to U S schools which strategies to use in which subjects and with which students Transformative ideas for cultivating a truly world class system of schooling both simple and complex ways to raise the bar for all students no matter what their background Educators in every country must ensure that their students are as prepared as possible to lead a future generation of citizens This thought provoking and copiously researched book provides educators with a blueprint for radical improvement based on the hard learned experiences of their peers around the world
