Macropprudential Policies to Enhance Financial Stability in the Caucasus and Central Asia Padamja Khandelwal,Ezequiel Cabezon,Sanan Mirzayev,Rayah Al-Farah,2022-03-10 Limited economic diversification has made the economies of the Caucasus and Central Asia particularly vulnerable to external shocks The economies in the region are heavily reliant on oil and mining exports as well as remittances In some countries tourism and capital flows also play a prominent role in aggregate economic activity *Congressional Record* United States. Congress,2012 Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set) Union of International Associations,2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events *A National Trauma Care System* National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on the Health of Select Populations,Board on Health Sciences Policy,Committee on Military Trauma Care's Learning Health System and Its Translation to the Civilian Sector,2016-10-12 Advances in trauma care have accelerated over the past decade spurred by the significant burden of injury from the wars in Afghanistan and Iraq Between 2005 and 2013 the case fatality rate for United States service members injured in Afghanistan decreased by nearly 50 percent despite an increase in the severity of

injury among U S troops during the same period of time But as the war in Afghanistan ends knowledge and advances in trauma care developed by the Department of Defense DoD over the past decade from experiences in Afghanistan and Iraq may be lost This would have implications for the quality of trauma care both within the DoD and in the civilian setting where adoption of military advances in trauma care has become increasingly common and necessary to improve the response to multiple civilian casualty events Intentional steps to codify and harvest the lessons learned within the military s trauma system are needed to ensure a ready military medical force for future combat and to prevent death from survivable injuries in both military and civilian systems This will require partnership across military and civilian sectors and a sustained commitment from trauma system leaders at all levels to assure that the necessary knowledge and tools are not lost A National Trauma Care System defines the components of a learning health system necessary to enable continued improvement in trauma care in both the civilian and the military sectors This report provides recommendations to ensure that lessons learned over the past decade from the military s experiences in Afghanistan and Iraq are sustained and built upon for future combat operations and translated into the U S civilian system

Sub-Saharan Africa's Risk Perception Premium: In the Search of Missing Factors William Gbohoui, Rasmané Ouedraogo, Yirbehogre Modeste Some, 2023-06-23 Policymakers from the sub Saharan Africa SSA region often flag a mispricing of their sovereign debt presumably originating from a perception risk by international investors that lead to unjustifiably high borrowing costs Against this background this paper explores the extent to which a potential SSA premium exists in the financial markets following a broader two fold approach Firstly using a sample of 1592 international primary sovereign fixed coupon bonds issued between 2003 2021 from Bond Radar by 89 countries we find that SSA countries pay significantly higher coupon at issuance compared to their peers from other regions Secondly we assess whether there is any bias against SSA countries in the secondary market that would result in higher refinancing cost Based on an unbalanced panel of quarterly data covering 107 countries over 1990 2022 we find that SSA countries pay higher refinancing costs in the secondary market The paper further explores whether there are other factors overlooked by the literature that matter for the risk pricing by international investors In that respect we explore the sensitivity of spreads to some structural dimensions where SSA countries face acute challenges the transparency of budget process the importance of the informal sector the level of financial development and the quality of public institutions The results show that the excess premium estimated for SSA countries vanishes when these structural factors are accounted for in the regressions
