Humanitarianism from Below Alejandro Olayo-M  ndez, 2025-08-05 Challenges the definition of humanitarian aid Aside from being one of the most important migration corridors in the world Mexico is becoming an immigrant destination itself with more and more migrants deciding or needing to stay in the country after failing to enter the United States In the absence of state aid migrant shelters have emerged as an informal welfare system for migrants asylum seekers refugees and deportees in Mexico Largely run by faith based humanitarian organizations these shelters have grown significantly in recent years Humanitarianism from Below examines the significance of these casas de migrantes migrant shelters in the migration process in Mexico The book also reviews the role of faith based humanitarian organizations whose engagement with migrants is perceived more as charity work than professional humanitarian work The volume argues that

faith based humanitarian organizations work challenges traditional understandings of what counts as humanitarian aid It makes the case that in order to understand the full ecology of migration we need to understand not only how large organizations like the Red Cross work but also how these smaller and local entities with fewer resources interact with migrants on their journeys Most migration research tends to focus on its impact within home countries or in destination contexts rarely focusing on the actual migration process including the interactions that influence the course of the migration journey itself In conducting this research Alejandro Olayo M ndez traveled along migrant routes several times in order to gain knowledge about how migrants move and how they interact with the migrant shelters He offers a detailed look at the experiences and challenges of casas de migrantes in Mexico situating these faith based shelters as an integral part of Mexico s humanitarian ecosystem

Retrosynthesis in the Manufacture of Generic Drugs Pedro Paulo Santos, William Heggie, 2020-11-09 Offers a compendium of information on retrosynthesis and process chemistry featuring innovative reaction maps showing synthetic routes of some widely used drugs This book illustrates how the retrosynthetic tool is applied in the Pharmaceutical Industry It considers and evaluates the many viable synthetic routes that can be used by practicing industrialists guiding readers through the various steps that lead to the best processes and the limits encountered if these are put into practice on an industrial scale of seven key Active Pharmaceutical Ingredient API It presents an evaluation of the potential each process has for implementation before merging the two points of view of retrosynthesis and process chemistry in order to show how retrosynthetic analysis assists in selecting the most efficient route for an industrial synthesis of a particular compound whilst giving insight into the industrial process The book also uses some key concepts used by process chemists to improve efficiency to indicate the best route to select Each chapter in *Retrosynthesis in the Manufacture of Generic Drugs* Selected Case Studies is dedicated to one drug with each containing information on worldwide sales and patent status of the Active Pharmaceutical Ingredient API structure analysis and general retrosynthetic strategy of the API first reported synthesis critical analysis of the processes which have been developed and comparison of the synthetic routes lessons learned reaction conditions for Schemes A to X chemical highlights on key reactions used during the synthesis and references Drugs covered include Gabapentin Clopidogrel Citalopram and Escitalopram Sitagliptin Ezetimibe Montelukast and Oseltamivir Show how the retrosynthetic tool is used by the Pharmaceutical Industry Fills a gap for a book where retrosynthetic analysis is systematically applied to active pharmaceutical ingredients APIs Features analyses and methodologies that aid readers in uncovering practical synthetic routes to other drug substances whether they be NCEs New Chemical Entities or generic APIs Active Pharmaceutical Ingredients Presents information from both the patent and academic literature for those who wish to use as a basis for further study and thought Features the use of reaction maps which display several synthetic processes in the same scheme and which allow easy comparisons of different routes that give the same molecule or intermediate A selection of these maps are available to download from <https://www.wiley.com/go/santos>

retrosynthesis Retrosynthesis in the Manufacture of Generic Drugs Selected Case Studies is an ideal book for researchers and advanced students in organic synthetic chemistry and process chemistry It will also be of great benefit to practitioners in the pharmaceutical industry particularly new starters and those new to process chemistry **Getting Better** Clare Bambara, Julia Lynch, Katherine E. Smith, 2025-05-27 Available open access digitally under CC BY NC ND licence Health inequality has reached a crisis point Your income or hometown can have a devastating impact on how well and how long you live This injustice exacerbated during the COVID 19 pandemic continues as the cost of living rises and other sources of inequity grow What can be done to make things better This book written by the authors behind the award winning The Unequal Pandemic explores successful international case studies of governments reducing health inequalities from the USA and Brazil to Germany and England stretching over fifty years from the 1960s to the 2000s Essential reading for students and scholars of public health and the social sciences and for health and social care professionals and policy makers this book demonstrates that reducing health inequalities is possible and provides a roadmap for today's governments to follow

Process-Structure-Properties in Polymer Additive Manufacturing Swee Leong Sing, Wai Yee Yeong, 2021-09-01 Additive manufacturing AM methods have grown and evolved rapidly in recent years AM for polymers is an exciting field and has great potential in transformative and translational research in many fields such as biomedical aerospace and even electronics Current methods for polymer AM include material extrusion material jetting vat polymerisation and powder bed fusion With the promise of more applications detailed understanding of AM from the processability of the feedstock to the relationship between the process structure properties of AM parts has become more critical More research work is needed in material development to widen the choice of materials for polymer additive manufacturing Modelling and simulations of the process will allow the prediction of microstructures and mechanical properties of the fabricated parts while complementing the understanding of the physical phenomena that occurs during the AM processes In this book state of the art reviews and current research are collated which focus on the process structure properties relationships in polymer additive manufacturing

Proceedings of the 6th International Asia Conference on Industrial Engineering and Management Innovation Ershi Qi, 2015-10-12 The 6th International Asia Conference on Industrial Engineering and Management Innovation is sponsored by the Chinese Industrial Engineering Institution and organized by Tianjin University The conference aims to share and disseminate information on the most recent and relevant researches theories and practices in industrial and system engineering to promote their development and application in university and enterprises

Functional Supramolecular Nanoassemblies of Π -Conjugated Molecules Penglei Chen, Bin Wu, 2020-01-13 conjugated systems of delocalized aromatic electrons along their backbones including conjugated small molecules oligomers polymers and carbonaceous materials etc have received considerable attention from a wide variety of scientific and technical communities Compared to inorganic materials the advantages of those based on tectons lie in their broad diversity flexibility and tunability with regard to structure geometry morphology processability composition functionality electronic band structure etc In terms of sophisticated molecular engineering these features endow them not only with excellent self assembly properties but also with unique optical electrical mechanical photophysical photochemical and biochemical attributes This renders them promising scaffolds for advanced functional materials AFMs in numerous areas of general interest such as electronics optics optoelectronics photovoltaics magnetic and piezoelectric devices sensors catalysts biomedicines and others With regard to the design synthesis of novel tectons the launch of diverse assembly fabrication protocols theoretical calculations etc the past several decades have witnessed tremendous advancements along this direction Thus far a vast array of high performance tectons based AFMs have been initiated To some extent the cooperative principle of stacking and other noncovalent interactions has been revealed and the structure property relationships have been disclosed Despite the existing progress this field still faces challenges for example i the need for

scalable assembly manufacture under ambient conditions with low cost facile environmentally friendly protocols ii clearer correlations bridging the underlying intricate relationships of each successive step in assembly manufacture iii corresponding theoretical calculations for guiding the rational design of tectons that elucidate the cooperative principle of stacking and other noncovalent interactions as well as the principle of structure performance correlation iv stability and durability among the most important concerns regarding their commercialization The advancements accumulated during the past decades have established a solid foundation for the further development of conjugated systems based AFMs We believe that with unrelenting efforts from both scientific and technical communities of various backgrounds their practical applications will eventually be fulfilled This Research Topic aims to address the above mentioned challenges

Packaged Plants Anita Hardon, Michael Lim Tan, 2024-11-12 Packaged Plants offers an absorbing ethnography and cultural history of how the production and consumption of plants for food and medicine has gone through metabolic rifts increasingly processed into commodities with adverse impact on health and aggravating existing economic and social inequities The book also describes ultra processed foods that are linked to metabolic syndrome including cardiovascular disease diabetes and obesity Divided into three parts the first part presents a comprehensive historical analysis of the socio metabolic shifts leading to the loss of plant sovereignty in the Philippines It scrutinizes colonial influences urbanization nutritional policies scientific research programs and neoliberal marketing strategies that have paved the way for the proliferation of packaged plant based products passed as food or medicines The second part delves into contemporary socio metabolic dynamics within Puerto Princesa interweaving urban political ecology frameworks with medical anthropological perspectives It elucidates the precarious circumstances of daily life in a boomtown compelling individuals to invest in supplements and engage in resource intensive multi level marketing endeavours The third and final part sheds light on efforts to reclaim plant sovereignty including a resurgence of backyard farming in response to food insecurity exacerbated by the COVID 19 pandemic Through meticulous research and insightful analysis Packaged Plants offers a compelling exploration of the intersectionality between health economics and environment in the Filipino context
