Wang, 2016-10-01 A volume on Theory and Practice of Adult and Higher Education or Foundations of Adult and Higher Education will appeal to both our graduate students and faculty as so many of them have been taking courses in both program areas and have been concerned with their defined areas of expertise Although theories and practices in Adult Education and in Higher Education are being used interchangeably there is a lack of scholarly work

that connects existing theories and practices across the two fields The proposed ground breaking volume will cover topics theories practices in both fields of Adult Education and of Higher Education and in doing so will bring to the fore the connections that make these two fields truly inseparable The proposed volume will therefore generate new knowledge to share among faculty graduate students and other researchers who practice not only in Adult Education but also in Higher Education

Difficult Subjects Badia Ahad-Legardy,OiYan A. Poon,2023-07-03 Difficult Subjects Insights and Strategies for Teaching about Race Sexuality and Gender is a collection of essays from scholars across disciplines institutions and ranks that offers diverse and multi faceted approaches to teaching about subjects that prove both challenging and often uncomfortable for both the professor and the student It encourages college educators to engage in forms of practice that do not pretend that teachers and students are unaffected by world events and incidents that highlight social inequalities Readers will find the collected essays useful for identifying new approaches to taking on the difficult subjects of race gender and sexuality The book will also serve as inspiration for academics who believe that their area of study does not allow for such pedagogical inquiries to also teach in ways that address difficult subjects Contributors to this volume span a range of disciplines from criminal justice to gender studies to organic chemistry and demonstrate the productive possibilities that can emerge in college classrooms when faculty consider identity as constitutive of rather than divorced from their academic disciplines Discussions of race gender and sexuality are always hot button issues in the college classroom whether they emerge in response to a national event or tragedy or constitute the content of the class over a semester long term Even seasoned professors who specialize in these areas find it difficult to talk about identity politics in a room full of students And many professors for whom issues of racial and sexual identity is not a primary concern find it even more challenging to raise these issues with students Offering reflections and practical guidance the book accounts for a range of challenges facing college educators and encourages faculty to teach with courage and conviction especially when it feels as though the world around us is crashing down upon our students and ourselves

Lamarck's Revenge Peter Ward, 2018-08-14 A riveting explanation of epigenetics offering startling insights into our inheritable traits In the 1700s Jean Baptiste Lamarck first described epigenetics to explain the inheritance of acquired characteristics however his theory was supplanted in the 1800s by Darwin's theory of evolution by natural selection through heritable genetic mutations But natural selection could not adequately explain how rapidly species re diversified and repopulated after mass extinctions Now advances in the study of DNA and RNA have resurrected epigenetics which can create radical physical and physiological changes in subsequent generations by the simple addition of a single small molecule thus passing along a propensity for molecules to attach in the same places in the next generation Epigenetics is a complex process but paleontologist and astrobiologist Peter Ward breaks it down for general readers using the epigenetic paradigm to reexamine how the history of our species from deep time to the outbreak of the Black Plague and into the present has left its mark on our physiology behavior and intelligence Most alarming are chapters about epigenetic changes we are undergoing now triggered by toxins environmental pollutants famine poor nutrition and overexposure to violence Lamarck's Revenge is an eye opening and provocative exploration of how traits are inherited and how outside influences drive what we pass along to our progeny

Citizen Knowledge Lisa Herzog, 2023-09-15 Citizen Knowledge discusses how various forms of knowledge are dealt with in societies that combine a democratic political system with a capitalist economic system How do citizens learn about politics How are scientific insights taken up in politics What role can markets play for processing decentralized knowledge Lisa Herzog argues that the fraught relation between democracy and capitalism gets out of balance if too much knowledge is treated according to the logic of markets Complex societies need different mechanisms for dealing with knowledge among which democratic deliberation and expert communities are central Citizen Knowledge develops the vision of an egalitarian society that considers the use of knowledge in society a matter of shared democratic responsibility

New Topological Invariants For Real- And Angle-valued Maps: An Alternative To Morse-Novikov Theory Dan Burghelea, 2017-08-16 This book is about new topological invariants of real and angle valued maps inspired by Morse Novikov theory a chapter of topology which has recently raised interest outside of mathematics for example in data analysis shape recognition computer science and physics They are the backbone of what the author proposes

as a computational alternative to Morse Novikov theory referred to in this book as AMN theory These invariants are on one side analogues of rest points instantons and closed trajectories of vector fields and on the other side refine basic topological invariants like homology and monodromy They are associated to tame maps considerably more general than Morse maps that are defined on spaces which are considerably more general than manifolds They are computable by computer implementable algorithms and have strong robustness properties They relate the dynamics of flows that admit the map as Lyapunov map to the topology of the underlying space in a similar manner as Morse Novikov theory does
