Lemon-Aid New and Used Cars and Trucks 1990-2015 Phil Edmonston, 2013-11-18 Lemon Aid New and Used Cars and Trucks 1990 2015 steers the confused and anxious buyer through the purchase of new and used vehicles unlike any other car and truck book on the market Dr Phil Canada's best known automotive expert for more than 42 years pulls no punches

Intelligent Transportation System Fouad Sabry, 2024-12-17

- 1 Intelligent transportation system Introduction to ITS and its role in integrating technology into transportation systems
- 2 Traffic engineering transportation Explores the relationship between traffic engineering principles and their application to modern ITS
- 3 Telematics Overview of telematics systems focusing on their impact on realtime vehicle and traffic data exchange
- 4 Floating car data Investigates the role of floating car data in monitoring traffic conditions and improving infrastructure planning
- 5 Advanced driver assistance system Explores the growing importance of ADAS in enhancing vehicle safety and performance
- 6 Lane departure warning system Analyzes how this system improves road safety by warning drivers of unintended lane deviations
- 7 Vehicular communication systems Provides insights into communication systems that allow vehicles to exchange information in realtime
- 8 TIRTL Explains the role of TIRTL technology in improving traffic flow and road management with intelligent sensors
- 9 Vehicular ad hoc network Examines the implementation of V2X networks to enhance vehicle communication and traffic safety
- 10 Vehicle infrastructure integration Discusses how the integration of vehicles with infrastructure facilitates smarter and safer roads
- 11 Vehicle safety technology Covers innovations in vehicle safety systems from sensors to automated emergency responses
- 12 Traffic optimization Delves into strategies for optimizing traffic flow and reducing congestion through intelligent systems
- 13 Intelligent speed assistance Focuses on technologies that help regulate vehicle speed in response to road conditions
- 14 Collision avoidance system Investigates collision avoidance mechanisms that proactively prevent accidents using advanced sensors
- 15 Driver drowsiness detection Explores systems designed to detect and alert drivers to fatigue enhancing safety
- 16 Traffic count Analyzes traffic counting technologies used to gather data for better infrastructure planning and management
- 17 Collision avoidance in transportation Discusses the broader application of collision avoidance systems across different transportation modes
- 18 IRIS transportation software Focuses on the IRIS software and its role in managing and optimizing transportation systems
- 19 Connected car Looks into the future of connected cars and how they interact with infrastructure and other vehicles
- 20 Iteris Discusses the Iteris platform and its contribution to transportation management through data analytics
- 21 Vehicle to everything Explores the future of V2X technologies including how cars communicate with everything around them for safer more efficient driving

Traffic Sign Recognition Fouad Sabry, 2024-05-04 What is Traffic Sign Recognition Traffic sign recognition TSR is a technology by which a vehicle is able to recognize the traffic signs put on the road e.g speed limit or children or turn ahead This is part of the features collectively called ADAS The technology is being developed by a variety of automotive suppliers It uses image processing techniques to detect the traffic signs The detection

The North American Auto Industry since NAFTA Greig Mordue,Dimitry Anastakis,2024-10-01 The auto sector is North America s most iconic of industries Since the North American Free Trade Agreement came into existence in 1994 the sector has undergone tremendous change escalating concerns around climate change advances in electric and automated vehicles deindustrialization reindustrialization and the rise of low cost locations as hubs for manufacturing The North American Auto Industry since NAFTA examines the issues that have preoccupied the development of policy associated with the manufacture of automobiles in North America The collection addresses the punctuations that have afflicted the industry since NAFTA s implementation as well as the slower incremental evolutions that have also occurred Several aspects of automobility and the industry are explored including but not limited to the Canadian American and Mexican automotive sectors and their evolution and interaction under evolving trade regimes The book analyses issues surrounding labour technology trade policy regional development the environment and broader societal impacts of the automobile It also draws on the expertise of a wide cross section of industry experts and scholars to provide readers with a deeper understanding of the automotive industry and its central role in North America s economic business and political landscape

The New Domestic Automakers in the United States and Canada A.J. Jacobs,2015-12-16 Over the past forty years state provincial and local governments in the United States and Canada have provided foreign automakers with approximately 4 80 billion in incentives in order to lure light vehicles assembly plants to their areas This has included tax abatements infrastructure construction land giveaways job training programs and other subsidies As of early 2015 ten foreign vehicle makers operated 20 light vehicles in developed North America Despite the fact that all ten of these automakers have pursued a similar pattern first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America each has followed its own specific historical development path and has created its own unique growth trajectory This book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the United States and or Canada through early 2015 In addition it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the United States and Canada This includes the first foreign automaker to build its cars in the United States De Dion Bouton of France in July 1900 the early 20th Century endeavors of Fiat Mercedes and Rolls Royce and the present day hopes of Chinese and Indian automakers In the process the text also provides an assessment of the top competing states and sites for any future plants the possible incentives packages governments may offer to attract such facilities and an estimated incentive value for each automaker Overall the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more holistic look at the pros and cons of attracting Automobile Manufacturing FDI It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant Its findings should also prove informative to urban and regional planning political science sociology economics labor and international development scholars and students in North America and worldwide
