ICEL 2018 13th International Conference on e-Learning Professor Eunice Ivala, 2018-07-05 Annual Report National Research Foundation (South Africa), 2016 Women's Empowerment for a Sustainable Future Claude-Hélène Mayer, Elisabeth Vanderheiden, Orna Braun-Lewensohn, Gila Chen, Kiyoko Sueda, Brightness Mangolothi, Saba Safdar, Soyeon Kim, 2023-07-08 This edited volume focuses on women's empowerment for a sustainable future. It takes cultural and transcultural and positive psychology perspectives into consideration and explores the topic of women's empowerment from diverse stances across social strata, cultural divides as well as economic and political divisions. It addresses the critique of the overly Western focus of positive psychology on this topic by adopting a transnational and transcultural lens and by taking non-WEIRD Western Educated Industrialized Rich Democratic samples into in-depth consideration. The chapters therefore focus on women from diverse socio-cultural, political, socio-economic backgrounds and discuss their ways of empowering others and being empowered. They also discuss related positive psychology constructs such as coping, resilience, transformation, growth, leadership, creativity, identity development, sustainable action as well as positive socio-economic, political and eco-sustainable thought and action. The volume as a whole looks at women's leadership as a factor of empowerment. A further fundamental assumption is that women's empowerment is needed to create a sustainable future at micro, meso and macro levels which presumes safety, peace, ecological considerations and compassionate leadership. *Information, Knowledge, and Technology for Teaching and*

Research in Africa Dennis Ocholla, Omwoyo Bosire Onyancha, Aderonke Olaitan Adesina, 2024-08-27 This book focuses on information seeking and the knowledge economy for teaching and research in Africa. The book first explores the evolution and current state of information seeking behavior research demonstrating its importance in informing practice policy and design of information systems. Despite the informal sector's substantial contributions to the national economy in Uganda, there is a lack of studies delving into its information needs as well as an information gap in government NGOs and other stakeholders. The book proposes that an appropriate information behavior model for information poor communities such as informal entrepreneurs must be grounded on oral traditions and indigenous knowledge and should be sensitive to poverty infrastructure and illiteracy. The negative impact of the lack of financial literacy skills for women entrepreneurs is investigated and solutions for this problem are suggested including regular assessments of women entrepreneurs' financial literacy skills and the introduction of training courses. The role of academic libraries in universities, library services for students with disabilities, and accessibility of library services to students with disabilities is discussed, and theoretical models for enhancing service in academic libraries are presented. The book highlights the specific challenges and opportunities related to information literacy for secondary schools and concludes by examining the rapid changes in library and information science research in South Africa.

Housing the Poor on the African Continent Mfundo Mandla Masuku, Oliver Mtshali, Primrose Thandekile Sabela, Nomusa M. Mlondo, 2022-10-13 This book explores the circumstances surrounding state-provided low-cost housing for people at the lower end of the housing market in Africa. It deploys Ubuntu philosophy to unpack the provision of housing security to citizens, arguing that interpreting housing rights within Ubuntu philosophy recognises the spirit of reciprocity and collective solidarity as fundamental to meeting the housing needs of low-income groups. In essence, the volume reflects on the values of Ubuntu and informs both policy and practice by guiding policymakers, researchers, and practitioners with the episteme of basic human rights and the Ubuntu philosophy. It pointedly grapples with issues that resonate with efforts by African governments to protect vulnerable citizens from multidimensional poverty, homelessness, gender-neutral policies, and self-help housing schemes. The book's insights raise red flags concerning the realisation of Ubuntu as a vehicle earmarked to deliver adequate and sustainable housing delivery outcomes. The volume is a must-read for academics, researchers, practitioners, government officials, and leaders from various sectors.
