Ensuring Quality in Professional Education Volume II Karen Trimmer, Tara Newman, Fernando F. Padró, 2019-01-11

This book examines quality teaching in professional education in the fields of engineering and international knowledge structures. The second of a two volume series, the editors and contributors structure the book around case studies which highlight the elements constituting good practice within professional education. While there is no one specific route to prepare well qualified professionals, this volume explores the decisions the academics responsible for delivering this education make to ensure quality curricula. Ultimately, the key to effective preparations rests with the value employers place on the focus, emphasis, and balance between the academic and practical in relation to their own expectations for skills that graduates must have. The second volume in this collection will appeal to students and scholars of professional pedagogy and engineering pedagogy more specifically.
