There are 80 cards in this packet covering all of Linear equations, quadratics, exponents, and real life word problems are just a few covered.
Let's even blank cards for teachers for their own questions.

I use these cards a few different ways in my classroom depending on the mix of students.

- **Play Solitaire War:**
Great for fun! Divide into two groups. Each group gets 10 cards each. For each turn, they each draw a card. They then have to solve both or one. Whoever solves both problems correctly wins the card. If they draw a discard, they discard it. Whoever has the most cards at the end of the game wins. Work must be shown.
- **Post ten cards around room like a scavenger hunt:**
I'll choose 10 based on the subject and make students find the 10 cards and post them in the room for accuracy.
- **Give ONE card to each student in class:**
Everyone solves their problem, then goes around and explains their problem. At the end of lesson, students would need to problems solved with their own explanation/ work. If you have 50 kids.
