

A DETAILED LESSON PLAN IN MATHEMATICS 7

I. Objectives

At the end of the session, the students must able to:

- A. Identify the steps in evaluating algebraic expressions
- B. Apply the steps in evaluating algebraic expressions
- C. Show appreciation in working with group activity

II. Subject Matter

Topic: Evaluating Algebraic Expression

Reference: E-Math by Orlando A. Oronce and Marilyn O. Mendoza

Instructional Materials: Visual aids, Graphic Organizer PowerPoint presentation, laptop, projector, activity envelope, chalk and board.

III. Instructional Procedure

Teacher's Activity	Student's Activity
A. Daily routine 1. Prayer Class let's all stand up. Before we start, _____ lead the prayer. 2. Greetings Good Morning class. 3. Checking of Attendance Is everybody present for today? B. Teaching to the Math Common Core State Standards F. D. Rivera, 2015-06-17 This is a methods book for preservice middle level majors and beginning middle school teachers It takes a very practical approach to learning to teach middle school mathematics in an emerging Age of the Common Core State Standards The Common Core State Standards in Mathematics CCSSM is not meant to be the official mathematics curriculum it was purposefully developed primarily to provide clear learning expectations of mathematics content that are appropriate at every grade level and to help prepare all students to be ready for college and the workplace A quick glance at the Table of Contents in this book indicates a serious engagement with the recommended mathematics underlying the Grade 5 through Grade 8 and traditional pathway Algebra I portions of the CCSSM first with issues in content practice assessment learning teaching and classroom management pursued next and in that order In this book we explore what it means to teach to the CCSSM within an alignment mindset involving content practice learning teaching and assessment The Common Core state content standards which pertain to mathematical knowledge skills and applications have been carefully crafted so that they are teachable learnable coherent fewer clearer and higher The practice standards which refer to institutionally valued mathematical actions processes and habits have been conceptualized in ways that will hopefully encourage all middle school students to engage with the content standards more deeply than merely acquiring mathematical knowledge by rote and imitation Thus in the CCSSM proficiency in content alone is not sufficient and so does practice without content which is limited Content and practice are both equally important and thus must come together in teaching learning and assessment in order to support authentic mathematical understanding This blended multisourced text is a getting smart book It prepares preservice middle level majors and beginning middle school teachers to work within the realities of accountable pedagogy and to develop a proactive disposition that is capable of supporting all middle school students in order for them to experience growth in mathematical understanding that is necessary for high school and beyond including future careers *Making Algebra Meaningful* Nicole L. Fonger, 2021 An essential understanding of the uses and practices of algebra remain out of reach for many students In this book award winning researcher Dr Nicole Fonger addresses the issue of how to support all learners to experience algebra as meaningful In a highly visual approach the book details four research based lenses with examples from 9th grade algebra classrooms 1 students algebraic reasoning and representing 2 goal directed classroom practices with technology 3 culturally and historically responsive algebra literacy and 4 teachers journeys toward antiracism The author makes connections among research in algebra education teaching algebra and leading ambitious equitable and antiracist visions for algebra education By the End of This Book You Will Learn how to support students to fluently reason and represent expressions equations and functions Learn how to design algebra lessons that are culturally and historically responsive to students experiences and social justice issues Learn to use sketch notes to reflect on and communicate complex ideas in teaching and learning algebra

Have a set of tools for guiding the design of instruction to support meaningful algebra learning for all students [Getting to the Core of Literacy for History/Social Studies, Science, and Technical Subjects, Grades 6-12](#) Vicky Giouroukakis, Maureen Connolly, 2013-05-14 Literacy is not just for English teachers anymore The new Common Core English Language Arts Standards aren't just for English teachers Fluent reading and writing are critically important to the study of history social studies science and technical subjects too What's more the progress your students make is directly tied to their ability to process information they read and to express their ideas in writing So how do you make literacy a focus of your teaching without taking time away from essential content This practical resource packed with teacher tested CCSS based sample lessons shows you how using the Backward Design approach to set and meet your goals Each lesson template includes The teaching strategies you'll utilize Ways to incorporate technology and media Variations for differentiation and interdisciplinary connections Links to the work of major educational theorists Following these models you'll set the CCSS in your sights and develop lessons that both meet standards and fit your classroom Before you know it you'll be infusing reading and writing across your curriculum in purposeful and meaningful ways **Algebra 1** McDougal Littell Incorporated, Ron Larson, 2003

Beckmann,Denisse R. Thompson,Rheta N. Rubenstein,2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i e teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical

knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans
