Rury,2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree *Math & Reading, Grade 2* Brighter Child,2014-01-02 Master Skills Math Reading provides parents and students with the perfect resource for fun standards based activities with real life applications for skill mastery The Master Skills series helps your child master crucial skills for school success Short engaging practice activities support Common Core State Standards for second graders The Master Skills workbook series provides comprehensive practice in reading reading comprehension and math for students in grades K 3 Short activities with bright illustrations are fun to do Both parents and students will like the colorful engaging
