The Great American Education-Industrial Complex Anthony G. Picciano, Joel Spring, 2013-05-07 The Great American Education Industrial Complex examines the structure and nature of national networks and enterprises that seek to influence public education policy in accord with their own goals and objectives In the past twenty years significant changes have taken place in the way various interest groups seek to influence policies and practices in public education in the United States No longer left to the experience and knowledge of educators American education has become as much the domain of private organizations corporate entities and political agents who see it as a market for their ideas technologies and ultimately profits Picciano and Spring posit that educational technology is the vehicle whereby these separate movements organizations and individuals have become integrated in a powerful common entity and detail how the educational industrial complex has grown and strengthened its position of influence This timely carefully documented well argued book brings together Picciano s perspective and expertise in the field of technology and policy issues and Spring s in the history and politics of education in a unique critical analysis of the education industrial complex and its implications for the future **Algebra 2** Margaret L. Math Education for America? Mark Wolfmeyer, 2013-12-04 Math Education for America analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States The effort to standardize a national mathematics curriculum for public schools in the U S culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics Rather than looking at the text of specific policy documents this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis Breaking new ground in detailing and theorizing the politics of math education Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments human capital education policy debates over traditional and reform pedagogy the assumed content knowledge deficit of math teachers and the proliferation of profit driven educational businesses By establishing the interconnectedness of these interests with the national math education curriculum he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest
