Handbook of Research on Social Inequality and Education Wisdom, Sherrie, Leavitt, Lynda, Bice, Cynthia, 2019-06-28. In comparing one public school to another, discussions frequently include talk concerning the socioeconomics of a school or district, which then leads to talk about the advantages that one socioeconomic setting has over another. Educators tend to agree that low academic achievement frequently associated with a low socioeconomic status is a characteristic difficult to resolve for a population of school children. The *Handbook of Research on Social Inequality and Education* is a critical reference source that provides insights into social influences on school and educational settings. Featuring an array of topics including online learning, social mobility, and teacher preparation, this book is excellent for educational leaders, educational researchers, teachers, academicians, administrators, instructional designers, and teacher preparation programs.

Proofs in Competition Math: Volume 2 Alexander Toller, Freya Edholm, Dennis Chen, 2019-07-10. All too often, through common school mathematics, students find themselves excelling in school math classes by memorizing formulas but not their applications or the motivation behind them. As a consequence, understanding derived in this manner is tragically based on little or no proof. This is why studying proofs is paramount. Proofs help us understand the nature of mathematics and show us the key to appreciating its elegance. But even getting past the concern of why should this be true, students often face the question of when will I ever need this in life. *Proofs in Competition Math* aims to remedy these issues at a wide range of levels, from the fundamentals of competition math all the way to the Olympiad level and beyond. Don't worry if you don't know all of the math in this book; there will be prerequisites for each skill level, giving you a better idea of your current strengths and weaknesses and allowing you to set realistic goals as a math student. So, mathematical minds, we set you off.
