Abstract: The purpose of this study was to determine the effect of a 12-week training program on the physical fitness and health-related quality of life (HRQL) of sedentary, middle-aged women. The study was a randomized, controlled trial. The intervention group (n = 20) participated in a 12-week training program consisting of three sessions per week. The control group (n = 20) remained sedentary. The primary outcome was the change in HRQL, measured using the EuroQol-5D (EQ-5D) questionnaire. Secondary outcomes included changes in physical fitness, measured using the 6-minute walk test (6MWT) and the 10-meter walk test (10MWT). The results showed that the intervention group had a significant improvement in HRQL and physical fitness compared to the control group. The findings suggest that a 12-week training program can improve the physical fitness and HRQL of sedentary, middle-aged women.

H. Hall,2005 This major research study provides a fresh critical look at the way automobile electronics are and should be

built Written by Silicon Valley pioneer John Hall this book is based on his nearly 40 years of experience in developing and

producing semiconductors for the automobile industry and other customers Highly readable and comprehensible for even

beginning students of electronics and semiconductor design this volume provides an in depth explanation of the factors to be

considered when building vehicle systems Starting with a concise history of vehicle electronics Hall walks the reader through

the environmental conditions faced by these systems and the variety of failure mechanisms that can occur Basic and

advanced semiconductor issues raised by vehicle implementation are then discussed in detail A wide range of issues

confronting designers from over marketing of risky features to time and cost constraints are explained Complex electronic

modules from many different manufacturers are examined and discussed as real world case studies of good and bad design

techniques Hall concludes by providing design recommendations that will allow vehicle electronics system developers to

build much tougher devices at little or no incremental production cost This book is the first major work to focus on key issues

emerging as major causes of safety and performance problems Vehicle makers increasingly seek market advantages by

providing ever more capable electronics in their products While these features add much value to vehicles they fail in ways

that are beyond the experience and comprehension of most technicians and accident investigators By combining decades of

design experience and innovation with extensive research Hall has produced unique insights and explanations so engineers

can prevent most or perhaps all of these problems John Hall is one of Silicon Valley's most prolific independent pioneers and inventors He founded Union Carbide's semi conductor operation in 1962 He is a founder of Interstil and Micro Power Systems He is the inventor of the first electronic watch first LCD digital watch first CMOS liquid crystal display hand held calculator color autofocus cameras among many successful commercial products He has worked for many American and foreign automakers on specific projects such as integrated two way radios and seat belt interlocks He is working with DoD on hardening electronics systems against non nuclear events *Whitaker's Books in Print* ,1998 Popular Science ,1984-01 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better *Popular Mechanics* ,1984-12 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it's practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle **Popular Mechanics** ,1998-05 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it's practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle
