They say that fact is stranger than fiction This is a story of a girl who is brought up with very strict rules but then starts to

question just how binding they are She finds the courage to put them to the test and in doing so goes through the believable and unbelievable consequences She loses everything and everyone in the process She rebuilds her life She gets through only to repeat the experience again In the light of some present political and religious fanaticism this book has a lot to offer about understanding the imposing of views on others and believing that there is only one belief and one way of thinking

The Making of the Alice Books Ronald Reichertz, 2000 Analysing Lewis Carroll's Alice books in the context of children's literature from the seventeenth through the nineteenth century Ronald Reichertz argues that Carroll's striking originality was the result of a fusion of his narrative imagination and formal and thematic features from earlier children's literature The Making of the Alice Books includes discussions of the didactic and nursery rhyme verse traditionally addressed by Carroll's critics while adding and elaborating connections established within and against the continuum of English language children's literature Drawing examples from a wide range of children's literature Reichertz demonstrates that the Alice books are infused with conventions of and allusions to earlier works and identifies precursors of Carroll's upside down looking glass and dream vision worlds Key passages from related books are reprinted in the appendices making available many hard to find examples of early children's literature
