1. Draw a picture to show the division. Express your answer as a fraction.

a.  $1 \div 4$

$1 \div 4 = \frac{1}{4}$

b.  $3 \div 5$

$3 \div 5 = \frac{3}{5}$

c.  $7 \div 4$

$7 \div 4 = \frac{7}{4} = 1 \frac{3}{4}$

2. Using a picture, show how six people could share four sandwiches. Then, write an equation and solve.

$4 \div 6 = \frac{4}{6}$

$4 \times \frac{1}{6} = \frac{4}{6} = \frac{2}{3}$

chapters show how the initial leadership came from mathematicians in European nations and in the United States of America. The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since the 1930s had published under the name of a fictitious Nicolas Bourbaki. In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching especially in secondary schools and colleges. This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite. Undoubtedly this is a landmark publication in education. The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math from an international perspective. The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends.

**Common Core State Standards for Mathematics**, 2012      *Reforming a School System, Reviving a City* G. Maeroff, 2013-11-19 Can a bold investment in education turn around the economy of an entire city? Gene I. Maeroff, former national education correspondent for the New York Times, explores how the nonprofit group Say Yes to Education has instituted a network of reforms in Syracuse, New York, that aim to expand the city's middle class by supporting its children.

*Teaching to Change the World* Jeannie Oakes, Martin Lipton, Lauren Anderson, Jamy Stillman, 2018-01-29 Teaching to Change the World is an up-to-the-moment engaging social justice oriented introduction to education and teaching and the challenges and opportunities they present. Both foundational and practical, the chapters are organized around conventional topics but in a way that consistently integrates a coherent story that explains why schools are as they are. Taking the position that a hopeful democratic future depends on ensuring that all students learn, the text pays particular attention to inequalities associated with race, social class, language, gender, and other social categories and explores teachers' role in addressing them. This thoroughly revised fifth edition remains a vital introduction to the profession for a new generation of teachers who seek to become purposeful, knowledgeable practitioners in our ever-changing educational landscape for those teachers who see the potential for education to change the world.

Features and Updates of the New Edition Fully updated Chapter 1: The U.S. Schooling Dilemma reflects our current state of education after the 2016 U.S. presidential election. First-person observations from teachers, including first-year teachers, continue to offer vivid, authentic pictures of what teaching to change the world means and involves. Additional coverage of the ongoing effects of Common Core highlights the heated public discourse around teaching and teachers and charter schools. Attention to diversity and inclusion is treated as integral to all chapters woven throughout rather than tacked on as separate units. Digging Deeper resources on the new companion website include concrete resources that current and future teachers can use in their classrooms. Tools for Critique provides instructors and students questions, prompts, and activities aimed at encouraging classroom discussion and particularly engaging those students least familiar with the central tenets of social justice education.

**Teaching Mathematics in Grades 6 - 12** Randall E. Groth, 2012-08-10 A journey into the vibrant and intriguing world of mathematics education. Teaching Mathematics in Grades 6-12 explores how research in mathematics education can inform teaching practice in grades 6-12. The author shows secondary mathematics teachers the value of being a researcher in the classroom by constantly experimenting with methods for developing students' mathematical thinking and then connecting this research to practices that enhance students' understanding of the material. The chapters in Part I introduce secondary teachers to the field of mathematics education with cross-cutting issues that apply to teaching and learning in all mathematics content areas. The chapters in Part II are devoted to specific mathematics content strands and describe how students think about mathematical concepts. The goal of the text is to have secondary math teachers gain a deeper understanding of the types of mathematical knowledge their students bring to grade 6-12 classrooms and how students' thinking may develop in response to different teaching strategies.
