Hindu Perspectives on Evolution C. Mackenzie Brown, 2012-01-19 Providing new insights into the contemporary creationist evolution debates this book looks at the Hindu cultural religious traditions of India the Hindu Dharma traditions By focusing on the interaction of religion and science in a Hindu context it offers a global context for understanding contemporary creationist evolution conflicts and tensions utilizing a critical analysis of Hindu perspectives on these issues The cultural and political as well as theological nature of these conflicts is illustrated by drawing attention to parallels with contemporary Islamic and Buddhist responses to modern science and Darwinism The book explores various

ancient and classical Hindu models to explain the origin of the universe encompassing creationist as well as evolutionary but non Darwinian interpretations of how we came to be Complex schemes of cosmic evolution were developed alongside creationist proofs for the existence of God utilizing distinctly Hindu versions of the design argument After examining diverse elements of the Hindu Dharmic traditions that laid the groundwork for an ambivalent response to Darwinism when it first became known in India the book highlights the significance of the colonial context Analysing critically the question of compatibility between traditional Dharmic theories of knowledge and the epistemological assumptions underlying contemporary scientific methodology the book raises broad questions regarding the frequently alleged harmony of Hinduism the eternal Dharma with modern science and with Darwinian evolution in particular

O'Callaghan,2022-01-17 There are many ways of understanding the reality of the world we live in and experience Science philosophy art all offer us ample descriptions explanations and intuitions But Christian believers go beyond all that for they attempt to understand the origins of the universe in terms of the creation of the world by God Revelation tells us what God had in mind when he made the world ex nihilo without presuppositions of any kind God s Gift of the Universe attempts to present the principal elements and stages of creation theology The doctrine is to be found fundamentally of course in Scripture both Old and New Testament which describes the world in the light of God s word Yet since God actually gave existence to the world down to the last detail our reflection on God s word not only explains the reality of creation how it works its nature as science does It also explains how creation came into being in the mind and heart of the Triune God and ultimately why God created the world In God s Gift of the Universe a considerable effort has been spent throughout the book on the Christological and Trinitarian aspects of creation particularly in the theology of Church Fathers Creation is presented besides in a deeply eschatological key for God created the world for purpose of making his glory eternally manifest The book also considers the way God intervenes in the life of the created world through conservation in being and providence The meaning of time matter and spirit are considered The need for ecological awareness is central One aspect of the mystery of creation that receives special attention is the presence of evil in the world This is of particular importance once we accept that God made the world whole and entire thus assuming responsibility for the world as it is The origin of evil through the sin of spiritual creatures provides the ultimate though not the only explanation of the mystery of evil Particular consideration is given to the reality of original sin **Videodisc Correlatn GD Modern Biology 99** Holt Rinehart & Winston,1998-02

The Complete Idiot's Guide to Understanding Intelligent Design Christopher Carlisle, M.Div,W. Thomas Smith Jr.,2006-12-05 An objective overview of the biggest controversy in American education Intelligent Design is one of the hottest issues facing parents and educators to day but it can be hard to separate the facts from the heated rhetoric This expert and objective guide gets to the bottom of the questions What is Intelligent Design Should it replace or complement traditional science What s all the fuss about Explains the terms the controversy and the involvement of the American courts Indispensable guide for concerned educators and parents Written by an expert in the field *Selfish Genes and Christian Ethics* Neil Messer,2007-03-30 The evolutionary origins of human beings and in particular the origins of human morality have always attracted debate and speculation not just in the academic community but in popular science and the wider general population as well The arguments and explanations put forward over the years seem to thoroughly catch the popular imagination but there is the danger that these explanations tend to step outside the bounds of scientific theory and become powerful popular myths instead In Neil Messer s *Selfish Genes and Christian Ethics* the author is challenging this tendency Instead he provides a Christian theological anthropology which among other things aims to give Christians and the churches the confidence to engage with assumptions that evolutionary theory and religious beliefs are untenable This is a valuable resource for anyone engaged in the study of theology providing the reader with the ability to consider both the theoretical and the practical questions raised by evolutionary discussions of ethics and morality **Gene Avatars**

Pierre-Henri Gouyon,Jean-Pierre Henry,Jacques Arnould,2007-05-08 Why life Questions of this type were for a long time the prerogative of philosophers who left the how question to scientists Nowadays Darwin s successors no longer have any qualms about addressing the why as well as the how Over a century ago Darwin modestly admitted having thrown some light on the origin of species this mystery of mysteries Two major advances in the following decades helped biologists answer many of the questions he left unsolved The first was the discovery of the laws of heredity the second that of DNA Both provided Darwinian theory with the foundations that were lacking and led to the all embracing neo Darwinian synthesis Since then Theodosius Dobzhansky s aphorism nothing in biology makes sense except in the light of evolution has proven true more than once This does not suit everyone as evolutionist ideas have not lost their power to cause a scandal Darwin toppled man from

his pedestal Evolutionary genetics the subject of this book sends the individual crashing Considered until recently to be the target of selection and the focus of evolution the individual has been usurped by the gene The individual is nothing but the gene's avatar
