and training policy Teachers Matter and the McKinsey Company report entitled How the World's Best Performing School Systems Come Out on Top It now seems more important than ever to highlight some alternatives that might contribute to a broader understanding of the meaning of being a teacher In a time of standardised performance and accountability this special issue raises critical questions about the space for teachers agency and teachers as curriculum agents The different articles from some of our most distinguished researchers in the field provide essential perspectives on the question of where when and how teachers matter Our interest is not primarily to understand the scope of teachers agency but rather to understand what becomes important for teachers in their everyday activities such as teaching students handling educational norms and rules working in a local as well as a global society etc A common theme throughout the articles is that teachers matter in spaces where they can act as moral subjects in their profession in the present drawing on collective and individual experiences of the past whilst imagining a desired future This book was originally published as a special issue of the Journal of Curriculum Studies Parliamentary Debates (Hansard). Must Inclusion be Special? Jonathan Rix, 2015-06-05 Must Inclusion be Special examines the discord between special and inclusive education and why this discord can only be resolved when wider inequalities within mainstream education are confronted It calls for a shift in our approach to provision from seeing it as a conglomeration of individualised needs to identifying it as a conglomeration of collective needs The author examines the political medical and cultural tendency of current times to focus upon the individual and contrasts this with the necessity to focus on context This book distinguishes the theoretical perspectives that are often associated with special or inclusive education and the broad range of interests which depend upon their ongoing development This examination leads to a problematisation of mainstream education provision our understanding of why social inequities emerge and how additional support can overcome these inequities Further chapters explore the underlying challenges which emerge from our use and understanding of the notions of special and inclusive outlining an alternative approach based upon a community of provision This approach recognises the interconnectedness of services and the significance of context and it encapsulates the aspiration of much international legislation for participation and inclusion for all But it also assumes that we tend towards diffuse practices services policies settings and roles spread across provision which is variously inclusive and exclusionary In seeking to create equitable participation for all support needs to shift its focus from the individual to this diffuse network of contexts Must Inclusion be Special emerges from the research base which problematises inclusion and special education drawing upon examples from many countries It also refers to the author's research into pedagogy language and policy and his experiences as a teacher and the parent of a child identified with special educational needs
