Boating ,1994-07 *The Archaeologist's Manual for Conservation* Bradley A. Rodgers,2007-05-08 This is a Foreword by
an archaeologist not a conservator but as Brad Rodgers says Conservation has been steadily pulled from archaeology by the
forces of specialization p 3 and he wants to remedy that situation through this manual He sees this work as a call to action for the non
professional conservator permitting curators conservators and archaeologists to identify artifacts that need professional
attention and allow these professionals to stabilize most artifacts in their own laboratories with minimal intervention using
simple non toxic procedures p 5 It is the mission of Brad's manual to bring conservation back into archaeology p 6 The degree
of success of that goal depends on the degree to which archaeologists pay attention to and put to use what Brad has to say
because as he says The conservationist archaeologist is responsible to make preparation for an artifact's care even before it
is excavated and after its storage into the foreseeable future a tremendous responsibility p 10 The manual is a combination of
highly technical as well as common sense methods of conserving wood iron and other metals ceramics glass and stone
organics and composites a far better guide to artifact conservation than was available to me when I first faced that archaeological
challenge at colonial Brunswick Town North Carolina in 1958 a challenge still being faced by archaeologists today The stage
of conservation in 1958 is in dramatic contrast to the procedures Brad describes in this manual conservation has indeed
made great progress For instance a common procedure then was to heat the artifacts red hot in a furnace a method that made me
cringe
