Understanding Psychological Processes that Underlie Test Takers' Choices of Constructed Response Items

Holland, Rebecca Zwick, Xiang-Bo Wang, 1993 *The Relationship Between Item Format and Cognitive Processes in Wide-scale Assessment of Mathematics* Diane R. Garavaglia, 2001 *Uneducated Guesses* Howard Wainer, 2011-08-28 What statistical evidence shows us about our misguided educational policies

Uneducated Guesses challenges everything our policymakers thought they knew about education and education reform from how to close the achievement gap in public schools to admission standards for top universities In this explosive book Howard Wainer uses statistical evidence to show why some of the most widely held beliefs in education today and the policies that have resulted are wrong He shows why colleges that make the SAT optional for applicants end up with underperforming students and inflated national rankings and why the push to substitute achievement tests for aptitude tests makes no sense Wainer challenges the thinking behind the enormous rise of advanced placement courses in high schools and demonstrates why assessing teachers based on how well their students perform on tests a central pillar of recent education reforms is woefully misguided He explains why college rankings are often lacking in hard evidence why essay questions on tests disadvantage women why the most grievous errors in education testing are not made by testing organizations and much more No one concerned about seeing our children achieve their full potential can afford to ignore this book With forceful storytelling wry insight and a wealth of real world examples Uneducated Guesses exposes today s educational policies to the light of empirical evidence and offers solutions for fairer and more viable future policies **The Cumulative Book Index** ,1990 A world list of books in the English language **Resources in Education** ,1996-04 Books in Print ,1991 **On Giving Test Takers a Choice Among Constructive Response Times** Xiang Bo Wang,1999 **Scientific and Technical Aerospace Reports** ,1990 Cumulated Index Medicus ,1991
