2003 Expedition For Sale:

Is the Sacred for Sale Alison M Johnston, 2014-10-14 Definitely a book that sheds light on perspectives and perceptions about today's global economy. A must read for tourists and corporations alike, also heads of state, the media and environment groups, all of whom need to be informed on this key subject. Chief Garry John Chair and Spokesperson St at imc Chiefs Council, an activist's call to action on behalf of people who have been made invisible in the merciless spread of globalization under corporate control. Nina Rao Southern Co Chair of the Tourism Caucus at the UN Commission on Sustainable Development and Professor of Tourism. A powerful and much needed tool to fight the seemingly all pervasive ignorance in the corporate and consumer driven world that continues to hail ecotourism and other tourism alternatives as beneficial to local people without looking at the root causes of problems. Anita Pleumarom Tourism Investigation and Monitoring Team Bangkok. Tourism is the fastest growing industry in the world. Ecotourism often considered a more benign form of tourism can in fact cause the most damage as it targets more vulnerable environments and cultures. *Is the Sacred for Sale* looks at our present crossroads in consumer society. It analyses the big questions of tourism, clarifying how tourism can support biodiversity conservation. It also offers a cross cultural window to the divide between corporate thinking and sacred knowledge to help us understand why collisions over resources and land use are escalating. Finally we have a full spectrum of information for healthy dialogue and new relationships. This book is a profound wake up call to the business world and to decision makers who shape current policy. It poses important questions to us all and is a must read for every tourist and traveller. National RV Trader, May 2009, **Expedition Deep Ocean** Josh Young, 2020-12-01 The riveting story of the exploration of the final frontier of our planet, the deep ocean, and history making mission to reach the bottom of all five seas. Humankind has explored every continent on earth, climbed its tallest mountains and gone into space. But the largest areas of our planet remain largely a mystery, the deep oceans. At over 36 000 feet deep, there are areas closest to earth's core that have remained nearly impossible to reach until now. Technological innovations, engineering breakthroughs and the derring do of a team of explorers led by explorer Victor Vescovo brought together an audacious global quest to dive to the deepest points of all five oceans for the first time in history. The expedition pushed technology to the limits, mapped hidden landscapes, discovered previously unknown life forms and began to piece together how life in the deep oceans affects our planet, but it was far from easy. *Expedition Deep Ocean* is the inside story of this exploration of one of the most unforgiving and mysterious places on

our planet including the site of the Titanic wreck and the little understood Hadal Zone Vescovo and his team would design the most advanced deep diving submersible ever built where the pressure on the sub is 8 tons per square inch the equivalent of having 292 fueled and fully loaded 747s stacked on top of it And then there were hurricane laden ocean waters and the byzantine web of global oceanography politics Expedition Deep Ocean reveals the marvelous and other worldly life found in all five deep ocean trenches including several new species that have posed as of yet unanswered questions about survival and migration from ocean to ocean Then there are the newly discovered sea mounts that cause tsunamis when they are broken by shifting subduction plates and jammed back into the earth crust something that can now be studied to predict future disasters Filled with high drama adventure and the thrill of discovery Expedition Deep Ocean celebrates courage and ingenuity and reveals the majesty and meaning of the deep ocean **Billboard**, 2003-05-03 In its 114th year Billboard remains the world's premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends *Australia in Maps* National Library of Australia, 2007 Richly illustrated with exquisite manuscript maps and editions from celebrated European cartographic publishers of 17th century to familiar contemporary products such as tourist maps Discover the stories behind these maps the technological changes in map making and changes in human knowledge and representation of the world **Before Boas** Han F. Buschmann, 2008-10-31 Anthropologists and world historians make strange bedfellows Although the latter frequently employ anthropological methods in their descriptions of cross cultural exchanges the former have raised substantial reservations about global approaches to history Fearing loss of specificity anthropologists object to the effacing qualities of techniques employed by world historians this despite the fact that anthropology itself was a global comparative enterprise in the nineteenth century Rainer Buschmann here seeks to recover some of anthropology's global flavor by viewing its history in Oceania through the notion of the ethnographic frontier the furthestmost limits of the anthropologically known regions of the Pacific The colony of German New Guinea 1884-1914 presents an ideal example of just such a contact zone Colonial administrators there were drawn to approaches partially inspired by anthropology Anthropologists and museum officials exploited this interest by preparing large scale expeditions to German New Guinea Buschmann explores the resulting interactions between German colonial officials resident ethnographic collectors and indigenous peoples arguing that all were instrumental in the formation of anthropological theory He shows how changes in collecting aims and methods helped shift ethnographic study away from its focus on material artifacts to a broader consideration of indigenous culture He also shows how ethnological collecting often a

competitive affair could become politicized and connect to national concerns Finally he places the German experience in the broader context of Euro American anthropology Anthropology s Global Histories will interest students and scholars of anthropology history world history and Pacific studies *On a Mission* Valerie Neal, 2025-10-28 The definitive history of all 61 American women astronauts that s perfect for fans of *The Six* eager for more Sally Ride became a household name as the first American woman in space but scores of equally impressive women have also left their mark in space *On a Mission* The Smithsonian History of US Women Astronauts spans 45 years and 61 astronauts to share the epic journeys of women who made space for themselves in a male dominated field Valerie Neal emerita curator in the Department of Space History at the Smithsonian s National Air and Space Museum offers a culturally insightful history of the experiences of women astronauts the challenges they ve faced and their distinctive stories Collectively they ve completed more than 100 space shuttle missions and more than 30 long duration stays on the International Space Station and Russian Space Station Mir and they continue to prove themselves in present day space exploration efforts The book includes 50 black and white photographs to complement the historical account With its sweeping look from the first women astronauts to Christina Hammock Koch assigned to the first crewed Artemis mission around the Moon there is no comparably thorough book on America s women astronauts *On a Mission* is an inspiring tribute to unsung women s history
