and Gatherers in the Modern World Megan Biesele,Robert K. Hitchcock,Peter P. Schweitzer,2000-04-01 In an age of
heightened awareness of the threat that western industrialized societies pose to the environment hunters and gatherers
attract particularly strong interest because they occupy the ecological niches that are constantly eroded Despite the denial of
sovereignty the world s more than 350 million indigenous peoples continue to assert aboriginal title to significant portions of
the world s remaining bio diversity As a result conflicts between tribal peoples and nation states are on the increase Today

many of the societies that gave the field of anthropology its empirical foundations and unique global vision of a diverse and evolving humanity are being destroyed as a result of national economic political and military policies Although quite a sizable body of literature exists on the living conditions of the hunters and gatherers this volume is unique in that it represents the first extensive east west scholarly exchange in anthropology since the demise of the USSR Moreover it also offers new perspectives from indigenous communities and scholars in an exchange that be termed south north as opposed to north north denoting the predominance of northern Europe and North America in scholarly debate The main focus of this volume is on the internal dynamics and political strategies of hunting and gathering societies in areas of self determination and self representation More specifically it examines areas such as warfare and conflict resolution resistance identity and the state demography and ecology gender and representation and world view and religion It raises a large number of major issues of common concerns and therefore makes important reading for all those interested in human rights issues ethnic conflict grassroots development and community organization and environmental topics [Jerry Osborne's Rockin' Records](#) ,1997
