Copyright Office, 1952 *Index of Trademarks Issued from the United States Patent Office* , 1930 **Tunnel Visions** Michael Riordan, Lilian Hodgeson, Arienne W. Kolb, 2015-11-20 A detailed and engaging account of the development of the superconducting supercollider one of the largest scientific undertakings in the United States Journal of American History Starting in the 1950s US physicists dominated the search for elementary particles aided by the association of this research with national security they held this position for decades In an effort to maintain their hegemony and track down the elusive Higgs boson they convinced President Reagan and Congress to support construction of the multibillion dollar Superconducting Super Collider project in Texas the largest basic science project ever attempted But after the Cold War ended and the estimated SSC cost surpassed ten billion dollars Congress terminated the project in October 1993 Drawing on extensive archival research contemporaneous press accounts and over one hundred

interviews with scientists engineers government officials and others involved Tunnel Visions tells the riveting story of the aborted SSC project The authors examine the complex interrelated causes for its demise including problems of large project management continuing cost overruns and lack of foreign contributions In doing so they ask whether Big Science has become too large and expensive including whether academic scientists and their government overseers can effectively manage such an enormous undertaking Focusing on the scientific technical and political conflicts that led to delays ever rising costs and eventually the SSC s cancelation by Congress Tunnel Visions is a true techno thriller Burton Richter winner of the Nobel Prize in Physics Most good science stories are tales of discovery and success but failure can be just as riveting Here two historians and an archivist describe the greatest particle physics experiment that never was Scientific American **Federal**

Register ,2001-08 *Contracting Masculinity* Gillian Creese,1999-12-15 The history of labour in Canada is most often understood to mean and presented as the history of blue collar workers especially men And it is a story of union solidarity to gain wages rights and the like from employers In *Contracting Masculinity* Gillian Creese examines in depth the white collar office workers union at BC Hydro and shows how collective bargaining involves the negotiation of gender class and race Over the first 50 years of the office union s existence male and female members were approximately equal in number Yet equality has ended there Women are concentrated at the lower rungs of the job hierarchy while men start higher up the ladder and enjoy more job mobility men s office work has been redefined as a wide range of technical jobs while women s work has been concentrated in a narrow range of clerical positions As well for decades Canadian Aboriginals and people of colour were not employed by BC Hydro which has resulted in a racialized gendered workplace What is the role of workers and their trade unions in constructing male and female work a process that is often seen as the outcome solely of management decisions How is this process of gendering also racialized so that women and men of different race and ethnicity are differentially privileged at work How do males in a white collar union create and maintain their own image of masculinity in the face of a feminized occupation and a more militant male blue collar union housed within the same corporation What impact does the gender composition of union leadership have on collective bargaining How do traditions of union solidarity affect attempts to bargain for greater equity in the office These are the central questions that *Contracting Masculinity* seeks to answer in this in depth look at a Canadian union **Automotive News** ,1979 **Inventory of Federal Archives in the States** ,1941

Clearinghouse Review ,1988 *Ideology and the Rationality of Domination* Gerhard Wolf,2020-06-09 This well researched clear and convincing historical study examines the ideology and politics of Germanization during the WWII occupation of Poland Nicholas Stargardt author of *The German War* Following the brutal invasion and occupation of Poland the Nazis moved swiftly to realize one of their key ideological aims the expansion of German living space This involved deporting Jews bringing in German settlers and establishing an evaluation process that separated Poles from ethnic Germans As simple as this might have seemed initially the various parts of the German occupation machinery were soon embroiled in a

bitter fight about the essence of Germanness and how to identify a German In this illuminating study Gerhard Wolf reveals an astonishing development in which a more inclusive understanding of Germanness based on the notion of Volk won out against an exclusive definition based on Rasse As Wolf demonstrates this decision paved the way for turning three million Poles into German citizens Parallel to the mass deportation and murder of Christian Poles and the genocide of Jewish Poles the Nazis paradoxically also presided over the largest forced assimilation program in German history Students and scholars of the Second World War the Holocaust and Nazism will find new analysis of German imperialism ethnic cleansing and genocide in this important book

The British Battleship 1906-1946 Norman Friedman, 2015-09-30 The British battleship is one of the most intensely studied of all naval topics but it is also among the most popular Norman Friedman is one of the most highly regarded of all naval writers with an avid following for his work Therefore a new book on British battleships by Friedman is a major event and has been eagerly awaited ever since knowledge of the project began to circulate among enthusiasts Friedman has the ability to bring new ideas to even the most over worked subjects based on extensive original research and a talent for explaining technology in the wider context of politics economics and strategy His latest book covers the development of Royal Navy capital ships including battlecruisers from the pre history of the revolutionary Dreadnought of 1906 to the last of the line HMS Vanguard in 1946 Replete with original insights the story that emerges will enlighten and surprise even the most knowledgeable The attraction of the book is enhanced by sets of specially commissioned plans of the important classes by John Roberts and A D Baker III both renowned experts in their own right plus a colour section featuring the original Admiralty draughts including a spectacular double gatefold For many with an interest in warships this will be the book of the year
