14 November Economics Paper1 Gauteng:

The Geography of South Africa Jasper Knight, Christian M. Rogerson, 2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa. It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa but also of relevance to other areas of the Global South. All chapters are original contributions providing a state of the art research baseline on key themes in physical human and environmental geography and in understanding the changing geographical landscapes of modern South Africa. These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world including issues of sustainable development and growth in the Global South. **Co-operativism and**

Local Development in Cuba, 2018-08-13 Co-operativism and Local Development in Cuba consists of a series of pathbreaking essays on the role of co-operativism and the new co-operatives in the democratic transformation of Cuba and the government's plan to update the model in the current context. The contributors are well known specialists on Cuba co-operativism and local development. With a shared concern for how an increased focus on co-operativism and local development can contribute to the updating of the Cuban model and the advance of socialism, the contributors to the book have placed an analysis of the issues involved in the broader context of the international co-operative movement and the ongoing capitalist development process in Latin America. Contributors include Milford Bateman, Al Campbell, Grizel Donstevez, S nchez, Cliff DuRand, Olga Fernandez, Ros, Julio C Gambina, Camila Pi eiro, Harnecker, Sonja Novkovi, Dayreli, Ojeda, Suris, Gabriela, Roffinelli, Frederick, S Royce, Dean, Sinkovi, Henry, Veltmeyer, Marcelo, Vieta. **The Youth Dividend** Jan H. Hofmeyr, 2012 **Promoting sustainable local economic development initiatives** Marius Venter, 2022 This book endeavours to outline case studies that promote sustainable Local Economic Development (LED) initiatives. It is generally believed that local governments are the foot soldiers of LED. However, this seems to be a myth as local governments in South Africa and elsewhere have not yet fulfilled this mandate and have been struggling for several years to implement LED initiatives. The distinctive merit of this book lies in the way it combines the South African context with the wider international development context in ways that there is a flow of information and ideas both ways. The book is an essential part of this sequence of ideas, development and action at a critical time for strategic action directed at a sustainable future. It showcases case studies and responses to the impacts of globalisation as a bridge between urban, rural and institutional action and reveals avenues for local government leadership in communities, research, student engagement and wider interactions.

Towards Employment-Intensive Growth in South Africa Anthony Black, 2016-07-01 South Africa's high rate of unemployment (26.4%) makes it a complete outlier compared with other middle income countries. Indeed, the unemployment rate rises to 36% if discouraged workers are taken into account. It underpins extreme poverty and inequality and is a major contributor to social dislocation. If it were not for increased social payments, poverty would have continued to increase since

the advent of democracy in 1994 Unemployment also represents a huge cost to growth This book focuses on the growth path of the economy The starting point is that while more rapid economic expansion is an important objective at any given level of growth the economy as a whole needs to become more labour absorbing The central question posed is how to bring about changes in the economic structure and pattern of development which would lead to the attainment of this objective The authors argue that employment needs to be much more centrally positioned within the economic and social policy arena They emphasise innovative approaches within a broader focus on the growth path and employment intensive growth And they posit that the negative impact of previous distortions requires much more than a levelling of the playing field via market based reforms Apart from presenting an alternative growth path which could start to shift the economy in new directions the book tackles themes which have received only limited attention such as wage subsidies youth unemployment and employment growth in rural areas

The Changing Space Economy of City-Regions Koech Cheruiyot, 2017-10-30 This book addresses the South African Space Economy and its stark disparities and dualisms through an assessment of the Gauteng City Region the largest economic agglomeration in the country and on a continent bedevilled by a myriad of development challenges The book's focus on understanding the overall character of Gauteng City Region's Space Economy through data mining analysis and mapping comprehensively supplements the Space Economy literature on the region It covers the disparities exacerbated by an overlay of apartheid planning ideology and top down regional development based on selective encouragement of manufacturing investments in growth points or poles and how implementation of past policies intended to cure these disparities have yielded mixed results This book further offers the Gauteng City Region as a microcosm of the national economy in the form of evident significant placed based variations in the intensity and character of economic structure that on the one hand enjoys massive agglomeration economies while on the other has high levels of poverty and large numbers of people living below the Minimum Living Level This book should appeal to urban studies specialists economists and development studies researchers in the Global South

Understanding African Real Estate Markets Aly Karam, François Viruly, Catherine Kariuki, Victor Akujuru, 2022-04-28 This book brings together a broad range of research that interrogates how real estate market analysis finance planning and investment for residential and commercial developments across the African continent are undertaken In the past two decades African real estate markets have rapidly matured creating the conditions for new investment opportunities which has increased the demand for a deeper understanding of the commercial and residential markets across the continent The chapters consider issues that pertain to formal real estate markets and the critical relationship between formal and informal property markets on the continent With contributing authors from South Africa Ghana Nigeria Uganda Kenya and Tanzania the book considers the achievements of African real estate markets while also highlighting the complex central themes such as underdeveloped land tenure arrangements the availability of finance in both the commercial and residential sectors rapidly growing urban areas and

inadequate professional skills This book is essential reading for students in real estate land management planning finance development and economics programs who need to understand the nuances of markets in the African context Investors and policy makers will learn a lot reading this book too **Who's who of Southern Africa** ,2002 Vols for 1967 70 include as a section Who s who of Rhodesia Mauritius Central and East Africa **Digital Transformation in Aviation, Tourism and Hospitality in Southeast Asia** Azizul Hassan,Nor Aida Abdul Rahman,2022-11-17 Technological advances and the drive to digitalize business processes in aviation tourism and hospitality have forced the industries to go along with the digital movement The results are often mixed This book brings together contributions from leading scholars in the field and explores the digital transformation in these industries in Southeast Asia The book looks at the impact of digital transformation on the region and the issues and challenges brought about by this transformation It also addresses trends in the industries from blockchain technology AI biometric and mobile technology applications to in flight catering It examines the impact of COVID 19 on the industries and how the pandemic has led to businesses adopting new business models Through the case studies of digital adoptions in the region readers will gain insights on how the countries have leveraged new technologies and the implementation processes to drive digital transformation The book aims to help scholars and policy makers understand the digital advances in the industries to better formulate responses in research and policy making and deliver effective digital transformation *Intellectual Property, Pharmaceuticals and Public Health* Kenneth C. Shadlen,S. Guennif,2011-01-01 This impressive collection offers fascinating new perspectives on the impact of pharmaceutical patents on access to medicines in developing countries The volume s editors have put together an important book that sets out clearly the challenges to public health in a wide range of national contexts The book will be a valuable text for all scholars and decision makers interested in the global politics of intellectual property rights and public health Duncan Matthews Queen Mary University of London UK This up to date book examines pharmaceutical development access to medicines and the protection of public health in the context of two fundamental changes that the global political economy has undergone since the 1970s the globalization of trade and production and the increased harmonization of national regulations on intellectual property rights With authors from eleven different countries presenting case studies of national experiences in Africa Asia and the Americas the book analyzes national strategies to promote pharmaceutical innovation while at the same time assuring widespread access to medicines through generic pharmaceutical production and generic pharmaceutical importation The expert chapters focus on patents as well as an array of regulatory instruments including pricing and drug registration policies Presenting in depth analysis and original empirical research this book will strongly appeal to academics and students of intellectual property international health international political economy international development and law Glances at Renewable and Sustainable Energy Till Jenssen,2013-06-24 Differing interpretations perspectives and expectations on the term sustainability exist To take sustainability as an action guiding mandate for implementation it needs to be concrete and measurable as well

it should weigh pros and cons But how can such an integrated measurement in the field of renewable energy be conducted balancing the trade offs between opposing indicators Glances at Renewable and Sustainable Energy provides a thorough overview on the generic principles of sustainability assessment including projective thresholding and systemic principles and summarizes five common approaches for a holistic measurement Approaches such as multi criteria decision analysis ecological footprint analysis and normative functional concepts are applied to different case studies in developed emerging and developing countries to cover a wide bandwidth of various renewable energy carriers under various conditions Each case study includes 2 boxes illustrating the scheme behind the approach and exemplary calculations to allow a systematic comparison and a critical reflection of the methods applied Compiling results on renewable energy assessment of the last decades Glances at Renewable and Sustainable Energy gives researchers students consultants politicians and entrepreneurs the tools to advance their oriental and instructional knowledge on sustainability and sustainability measurement to reflect their decisions and tools for analysis and to transfer this knowledge into problem solving Forging Solidarity Astrid von Kotze, Shirley Walters, 2017-04-13 Animating this book is a twofold question In what ways are adult and popular educators responding to various harsh economic political cultural and environmental conditions In doing so are they planting seeds of hope for and imaginings of alternative futures which can connect individuals and communities locally and globally to achieve economic ecological and social justice The book illustrates how transformative politics of solidarity often involve actors across vastly different backgrounds Solidarity is therefore a political relationship that is forged through particular struggles situated in place and time across power differentials The authors put popular education to work by describing and analysing their strategies and approaches They do so using accessible language and engaging styles Popular education is a medium for dreaming for imagining other futures It is also essential for countering the wilful spreading of fake news and propagation of ignorance Pedagogies of solidarity are necessary to building connections amongst people at a time when competitive individualism and alienation are rampant Forging solidarity with and amongst communities is a means towards that end and indeed an end in itself Corporate mines and agribusiness poison the water we drink the air we breathe and the food we eat Together with their political proxies they destroy the earth and her peoples too many are killed because of their military economic religious and information wars How do we stand up for ourselves and the earth that nourishes us against this global system Forging Solidarity shares inspiring stories that feed our deep connection and power Preggs Govender Author of Love and Courage A Story of Insubordination Forging Solidarity is a critical and timely collective intervention that ponders prods pokes and plays in the most generative ways In so doing it invites us to continue deepening our engagements with questions of responsibility and justice in relation to education everywhere Richa Nagar author of Muddying the Waters Co authoring Feminisms across Scholarship and Activism This book inspires people to realize that not fighting against socio economic injustices is to side with oppressors Ntombi Nyathi Programme Director of Training for Transformation

Community-based Water Law and Water Resource Management Reform in Developing Countries Barbara C. P.

Koppen, Mark Giordano, John Butterworth, 2007 The lack of sufficient access to clean water is a common problem faced by communities efforts to alleviate poverty and gender inequality and improve economic growth in developing countries While reforms have been implemented to manage water resources these have taken little notice of how people use and manage their water and have had limited effect at the ground level On the other hand regulations developed within communities are livelihood oriented and provide incentives for collective action but they can also be hierarchal enforcing power and gender inequalities This book shows how bringing together the strengths of community based laws rooted in user participation and the formalized legal systems of the public sector water management regimes will be more able to reach their goals

Changing the Course of AIDS David Dickinson, 2011-03-15 Changing the Course of AIDS is an in depth evaluation of a new and exciting way to create the kind of much needed behavioral change that could affect the course of the global health crisis of HIV AIDS This case study from the South African HIV AIDS epidemic demonstrates that regular workers serving as peer educators can be as or even more effective agents of behavioral change than experts who lecture about the facts and so called appropriate health care behavior After spending six years researching the response of large South African companies to the epidemic that is decimating their workforce as well as South African communities David Dickinson describes the promise of this grassroots intervention workers educating one another in the workplace and community and the limitations of traditional top down strategies Dickinson s book takes us right into the South African workplace to show how effective and yet enormously complex peer education really is We see what it means when workers directly tackle the kinds of sexual gender religious ethnic and broader social and political taboos that make behavior change so difficult particularly when that behavior involves sex and sexuality Dickinson s findings show that people who are not officially health care experts or even health care workers can be skilled and effective educators In this book we see why peer education has so much to offer societies grappling with the HIV AIDS epidemic and why those interested in changing behaviors to ameliorate other health problems like obesity alcoholism and substance abuse have so much to learn from the South African example The Times Index , 1998 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement Depletion Shirin M. Rai, 2024-07-17 When thinking about the work of caring for others we often neglect the human cost born by those performing this care Feminists have long talked about the ways in which unpaid work particularly performed in the home is habitually undervalued by society but the work of caring for people both paid and unpaid can also take a toll on the health of individuals households and communities when we give more than we receive This lopsided gap between outflows and inflows as this book argues is depletion In Depletion Shirin M Rai examines the human costs of care work and how these are reproduced across the boundaries of class race gender and generation Depletion can be physical as measured by the body mass index exhaustion

sleeplessness and vital health signs It can also be mental manifesting as self doubt guilt and apprehension and the failure to take time for oneself family friends and community Moreover depletion has effects that extend well beyond the individual to households and communities Including case studies from different parts of the world and building on various methodologies Rai looks at the costs of care work or what she calls social reproduction in several forms biological reproduction unpaid work in the home and cultural and ideological work necessary to maintain social relations beyond the household Various chapters examine the costs of commuting to work and for care the value of unpaid work performed by women of different classes the costs of household work performed by children and the costs to communities when local economies are challenged by corporate interests Lastly Rai argues that depletion must be recognized in order for it to be reversed the struggles to reverse depletion are struggles for a good life generative of new imaginings of how care work both draining and joyful can be reorganized for a better future for all

Reducing Fuel Consumption and Greenhouse Gas Emissions of Medium- and Heavy-Duty Vehicles, Phase Two National Academies of Sciences, Engineering, and Medicine, Transportation Research Board, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on Assessment of Technologies and Approaches for Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles, Phase Two, 2020-06-15 Medium and heavy duty trucks motor coaches and transit buses collectively medium and heavy duty vehicles or MHDVs are used in every sector of the economy The fuel consumption and greenhouse gas emissions of MHDVs have become a focus of legislative and regulatory action in the past few years This study is a follow on to the National Research Council's 2010 report Technologies and Approaches to Reducing the Fuel Consumption of Medium and Heavy Duty Vehicles That report provided a series of findings and recommendations on the development of regulations for reducing fuel consumption of MHDVs On September 15 2011 NHTSA and EPA finalized joint Phase I rules to establish a comprehensive Heavy Duty National Program to reduce greenhouse gas emissions and fuel consumption for on road medium and heavy duty vehicles As NHTSA and EPA began working on a second round of standards the National Academies issued another report Reducing the Fuel Consumption and Greenhouse Gas Emissions of Medium and Heavy Duty Vehicles Phase Two First Report providing recommendations for the Phase II standards This third and final report focuses on a possible third phase of regulations to be promulgated by these agencies in the next decade

A youth empowerment model designed to tackle school violence in South Africa Fathima Dewan, 2024-12-17 School based violence is of major concern in the South African schooling system particularly in secondary schools School based violence has a negative impact on the physical social cognitive and emotional well being of learners and teachers To compound matters family and community environment also play a role in escalating school violence There is a need to develop interventions that are evidence based and developmental in nature to address the issue of reducing school based violence Youth empowerment can be used as a helpful strategy to address the issue of school based violence This scholarly book focuses on using the framework of youth empowerment to

address the issue of school based violence Through sound research the author proposes that schools should involve learners in decision making around school policies and design strategies to address school violence to create safer schools and a better school climate The author further posits using key aspects of youth empowerment in school violence campaigns and programmes to increase youth motivation to collectively influence changes within their school through a process of shared decision making collective vision and partnership with young people **Interpellations, Questions and Replies of the National Assembly** South Africa.
