The Political Economy of Uneven and Combined

Development Ray Hudson, 2025-07-04 The focus of this book is the processes through which industries and regions grow and decline in capitalist economies via an investigation of the trajectory of change in the North East of England How and why did its economy grow from the sixteenth century to be a Workshop of the World by the outbreak of the First World War only to collapse a decade later How and why did the region then become a laboratory for experiments in state policies to reverse economic decline policies that have largely failed How did the region become transformed from one with indigenous

innovative firms to one of foreign branch plants focused on routine component production and assembly to a deindustrialised region which became the destination for call centres and Amazon distribution centres What were the economic labour market and social consequences of these changes The account of regional change is framed in terms of uneven and combined development temporally spatially and between and within the broad classes of Capital and Labour The core message of this book is that the growth and decline of the region and of the changing map of regional development are most appropriately understood within a conceptual framework of uneven and combined development grounded in Marxian political economy This book will be of interest to academic researchers and students of political economy regional development geography sociology planning and policy studies as well as policymakers in central regional and local government **Current Catalog** National Library of Medicine (U.S.),1970 First multi year cumulation covers six years 1965 70 Selected Papers: Physical geography ,1970 Title Announcement Bulletin ,1956 Sessional Papers Ontario.
