National Library of Medicine Current Catalog National Library of Medicine (U.S.),1973 First multi year cumulation covers six years 1965 70 *Current Catalog* National Library of Medicine (U.S.),1968 Includes subject section name section and 1968 1970 technical reports **Philosophers and Kings** Gary McCulloch,2002-04-18 Philosophers and Kings examines the theme of education for leadership in English secondary education during the twentieth century *Freedom's Laboratory* Audra J. Wolfe,2020-08-04 The Cold War ended long ago but the language of science and freedom continues to shape public debates over the relationship between science and politics in the United States Scientists like to proclaim that science knows no borders Scientific researchers follow the evidence where it leads their conclusions free of prejudice or ideology But is that really the case In Freedom s Laboratory Audra J Wolfe shows how these ideas were tested to their limits in the high stakes propaganda battles of the Cold War Wolfe examines the role that scientists in concert with administrators and policymakers played in American cultural diplomacy after World War II During this period the engines of US propaganda promoted a vision of science that highlighted empiricism objectivity a commitment to pure research and internationalism Working both overtly and covertly wittingly and unwittingly with governmental and private organizations scientists attempted to decide what exactly they meant when they referred to scientific freedom or the US ideology More frequently however they defined American science merely as the opposite of Communist science Uncovering many startling episodes of the close relationship between the US government and private scientific groups Freedom s Laboratory is the first work to explore science s link to US propaganda and psychological warfare campaigns during the Cold War Closing in the present day with a discussion of the 2017 March for Science and the prospects for science and science diplomacy in the Trump era the book demonstrates the continued hold of Cold War thinking on ideas about science and politics in the United States *Shaping Science and Industry* C. B. Schedvin,1987 **Expository Science: Forms and Functions of Popularisation** T. Shinn,Richard P. Whitley,1985-06-30 The prevailing view of scientific popularization both within academic circles and beyond affirms that its objectives and procedures are unrelated to tasks of cognitive development and that its pertinence is by and large restricted to the lay public Consistent with this view popularization is frequently portrayed as a logical and hence inescapable consequence of a culture dominated by science based products and procedures and by a scientific ideology On another level it is depicted as a quasi political device for channeling the energies of the general public along predetermined paths examples of this are the nineteenth century Industrial Revolution and the U S Soviet space race Alternatively scientific popularization is described as a carefully contrived plan which enables scientists or their spokesmen to allege that scientific learning is equitably shared by scientists and non scientists alike This manoeuvre is intended to weaken the claims of anti scientific protesters that scientists monopolize knowledge as a means of sustaining their social privileges Popularization is also sometimes presented as a psychological crutch This in an era of increasing scientific specialisation permits the

researchers involved to believe that by transcending the boundaries of their narrow fields their endeavours assume a degree of general cognitive importance and even extra scientific relevance Regardless of the particular thrust of these different analyses it is important to point out that all are predicated on the tacit presupposition that scientific popularization belongs essentially to the realm of non science or only concerns the periphery of scientific activity *Energy Research Abstracts*

,1989 **The Final Victim of the Blacklist** Gerald Horne,2006-09-19 Before he attained notoriety as Dean of the Hollywood Ten the blacklisted screenwriters and directors persecuted because of their varying ties to the Communist Party John Howard Lawson had become one of the most brilliant successful and intellectual screenwriters on the Hollywood scene in the 1930s and 1940s with several hits to his credit including Blockade Sahara and Action in the North Atlantic After his infamous almost violent 1947 hearing before the House Un American Activities Committee Lawson spent time in prison and his lucrative career was effectively over Studded with anecdotes and based on previously untapped archives this first biography of Lawson brings alive his era and features many of his prominent friends and associates including John Dos Passos Theodore Dreiser F Scott Fitzgerald Charles Chaplin Gene Kelly Edmund Wilson Ernest Hemingway Humphrey Bogart Dalton Trumbo Ring Lardner Jr and many others Lawson s life becomes a prism through which we gain a clearer perspective on the evolution and machinations of McCarthyism and anti Semitism in the United States on the influence of the left on Hollywood and on a fascinating man whose radicalism served as a foil for launching the political careers of two Presidents Richard Nixon and Ronald Reagan In vivid marvelously detailed prose Final Victim of the Blacklist restores this major figure to his rightful place in history as it recounts one of the most captivating episodes in twentieth century cinema and politics **Campaigns for Peace** Richard K. S. Taylor,Nigel Young,1987 Scientific and Technical Aerospace Reports ,1989

Risk and the Control of Technology Alan Irwin,1985 **Anthropologica** ,2005 *Abortion and Woman's Choice* Rosalind Pollack Petchesky,2024-03-12 The best book I have read on the politics of reproduction It raises complex theoretical and strategic questions in a clear and accessible way and represents an important breakthrough in feminist thinking Leslie Doyal author of What Makes Women Sick This prize winning study is the definitive work on the politics of abortion and fertility Rosalind Pollack Petchesky provides overwhelming evidence against the anti abortion forces and in the process takes up issues of teenage sexuality the politics of eugenics and women s relationship to medical technology The book s continuing relevance is a tribute to the author and a sad indictment of contemporary politics

Agriculture and International Trade Michael Cardwell,Margaret R. Grossman,C. P. Rodgers,2003 The World Trade Organization WTO Agreement on Agriculture has had a fundamental impact on agricultural policy worldwide The new WTO agreements will cover agriculture sanitary and phytosanitary measures technical barriers to trade and trade in intellectual property rights This book addresses the interface between the law of international agricultural trade the emerging legal and economic order for agricultural trade under the auspices of the WTO and its impact on agricultural policy reform both in the

European Union and the USA With contributions from leading authorities in the appropriate areas

Social Hygiene in Twentieth Century Britain Greta Jones, 2025-04-01 In the early twentieth century a group of writers and publicists began to talk and write about social hygiene or more commonly known as the theory of eugenics By this they meant the improvement of the quality of the population by a conscious intervention in the biological laws which governed its growth development and reproduction This discussion led to the foundation of several social hygiene eugenics organisations the Eugenics Society the National Council for Mental Hygiene the Central Association for Mental Welfare the People s League of Health the New Health Society the National Institute for Industrial Psychology and several others First published in 1986 Social Hygiene in Twentieth Century Britain now with a new preface by the author suggests that they were linked by a set of interrelated ideas about health and social progress which was influential in the period from the First World War to the aftermath of the Second Its basic contention is that these groups were influenced by Social Darwinism and that they based their policies on two foundations the elimination of the unfit and the improvement of the general level of industrial and personal efficiency among the working class The book offers a critique of Foucault s theory of the development of the sciences of human life as well as relating the ideas of these groups to the social climate of British life The social management they envisaged was based on an expectation of deflation and a high level of unemployment They can thus be seen as throwing light on developments in Conservative policy on family life and the like

Global Transformations in the Life Sciences, 1945-1980 Patrick Manning, Mat Savelli, 2018-06-07 The second half of the twentieth century brought extraordinary transformations in knowledge and practice of the life sciences In an era of decolonization mass social welfare policies and the formation of new international institutions such as UNESCO and the WHO monumental advances were made in both theoretical and practical applications of the life sciences including the discovery of life s molecular processes and substantive improvements in global public health and medicine Combining perspectives from the history of science and world history this volume examines the impact of major world historical processes of the postwar period on the evolution of the life sciences Contributors consider the long term evolution of scientific practice research and innovation across a range of fields and subfields in the life sciences and in the context of Cold War anxieties and ambitions Together they examine how the formation of international organizations and global research programs allowed for transnational exchange and cooperation but in a period rife with competition and nationalist interests which influenced dramatic changes in the field as the postcolonial world order unfolded

The Cuban Missile Crisis Len Scott, R. Gerald Hughes, 2015-04-10 This volume brings together a collection of leading international experts to revisit and review our understanding of the Cuban Missile Crisis via a critical reappraisal of some of the key texts In October 1962 humankind came close to the end of its history The risk of catastrophe is now recognised by many to have been greater than realised by protagonists at the time or scholars subsequently The Cuban missile crisis remains one of the mostly intensely studied moments of world history Understanding

is framed and informed by Cold War historiography political science and personal experience written by scholars journalists and surviving officials The emergence of Soviet later Russian and other national narratives has broadened the scope of enquiry while scrutiny of the operational especially military dimensions has challenged assumptions about the risk of nuclear war The Cuban Missile Crisis A Critical Reappraisal brings together world leading scholars from America Britain France Canada and Russia to present critical scrutiny of authoritative accounts and to recast assumptions and interpretations The book aims to provide an essential guide for students of the missile crisis the diplomacy of the Cold War and the dynamics of historical interpretation and reinterpretation Offering original ideas and agendas the contributors seek to provide a new understanding of the secrets and mysteries of the moment when the world went to the brink of Armageddon This book will be of great interest to students of the Cuban missile crisis Cold War Studies nuclear proliferation international history and International Relations in general

Shaping Biology Toby A. Appel, 2003-04-30 Historians of the postwar transformation of science have focused largely on the physical sciences especially the relation of science to the military funding agencies In *Shaping Biology* Toby A Appel brings attention to the National Science Foundation and federal patronage of the biological sciences Scientists by training NSF biologists hoped in the 1950s that the new agency would become the federal government's chief patron for basic research in biology the only agency to fund the entire range of biology from molecules to natural history museums for its own sake Appel traces how this vision emerged and developed over the next two and a half decades from the activities of NSF's Division of Biological and Medical Sciences founded in 1952 through the cold war expansion of the 1950s and 1960s and the constraints of the Vietnam War era to its reorganization out of existence in 1975 This history of NSF highlights fundamental tensions in science policy that remain relevant today the pull between basic and applied science funding individuals versus funding departments or institutions elitism versus distributive policies of funding issues of red tape and accountability In this NSF funded study Appel explores how the agency developed how it worked and what difference it made in shaping modern biology in the United States Based on formerly untapped archival sources as well as on interviews of participants and building upon prior historical literature *Shaping Biology* covers new ground and raises significant issues for further research on postwar biology and on federal funding of science in general *Federal Register*

, 1978-12 **The New Era in American Mathematics, 1920-1950** Karen Hunger Parshall, 2022-02-22 The 1920s witnessed the birth of a serious mathematical research community in America Prior to this mathematical research was dominated by scholars based in Europe but World War I had made the importance of scientific and technological development clear to the American research community resulting in the establishment of new scientific initiatives and infrastructure Physics and chemistry were the beneficiaries of this renewed scientific focus but the mathematical community also benefitted and over time began to flourish Over the course of the next two decades despite significant obstacles this constellation of mathematical researchers programs and government infrastructure would become one of the strongest in the

world In this meticulously researched book Karen Parshall documents the uncertain but ultimately successful rise of American mathematics during this time Drawing on research carried out in archives around the country and around the world as well as on the secondary literature she reveals how geopolitical circumstances shifted the course of international mathematics She provides surveys of the mathematical research landscape in the 1920s 30s and 40s introduces the key players and institutions in mathematics at that time and documents the effect of the Great Depression and the second world war on the international mathematical community The result is a comprehensive account of the shift of mathematics center of gravity to the American stage
