Conway,2011-10-03 The U S scientific community has long led the world in research on such areas as public health
environmental science and issues affecting quality of life These scientists have produced landmark studies on the dangers of
DDT tobacco smoke acid rain and global warming But at the same time a small yet potent subset of this community leads the
world in vehement denial of these dangers Merchants of Doubt tells the story of how a loose knit group of high level
scientists and scientific advisers with deep connections in politics and industry ran effective campaigns to mislead the public
and deny well established scientific knowledge over four decades Remarkably the same individuals surface repeatedly some
of the same figures who have claimed that the science of global warming is not settled denied the truth of studies linking
smoking to lung cancer coal smoke to acid rain and CFCs to the ozone hole Doubt is our product wrote one tobacco executive
These experts supplied it Naomi Oreskes and Erik M Conway historians of science roll back the rug on this dark corner of the

Radiation Experiments** Advisory Committee on Human Radiation Experiments,1996-06-06 This book describes in
fascinating detail the variety of experiments sponsored by the U S government in which human subjects were exposed to
radiation often without their knowledge or consent Based on a review of hundreds of thousands of heretofore unavailable or
classified documents this Report tells a gripping story of the intricate relationship between science and the state Under the
thick veil of government secrecy researchers conducted experiments that ranged from the mundane to such egregious
violations as administering radioactive tracers to mentally retarded teenagers injecting plutonium into hospital patients and
intentionally releasing radiation into the environment This volume concludes with a discussion of the Committee s key
findings and guidelines for changes in institutional review boards ethics rules and policies and balancing national security
