Architect of Air Power Brian D. Laslie, 2017-10-06 A biography of the pioneering four star general chronicling his influence on the United States Air Force At age 36 Laurence S Kuter 1905 1979 became the youngest general officer since William T Sherman He served as deputy commander of allied tactical air forces in North Africa during World War II and helped devise the American bombing strategy in Europe Although his combat contributions were less notable than other commanders in the Eighth Air Force few officers saw as many theaters of operation as he did or were as highly sought after After World War II he led the Military Air Transport Service Air University Far East Air Forces and served as commander in chief of the North American Air Defense Command NORAD Despite these accomplishments and others however Kuter remains widely underappreciated In *Architect of Air Power* Brian D Laslie offers the first biography of this important but unsung pioneer whose influence can be found in every stage of the development of an independent US Air Force From his early years at West Point to his days at the Air Corps Tactical School to his leadership role at NORAD Kuter made his mark with quiet efficiency He was an early advocate of strategic bombardment rather than pursuit or fighter aviation fundamentally changing the way air power was used and later helped implement the Berlin airlift in 1948 In what would become a significant moment in military history he wrote Field Manual 100 20 which is considered the Air Force s

declaration of independence from the Army Drawing on diaries letters and scrapbooks Laslie offers a complete portrait of this influential soldier Architect of Air Power illuminates Kuter s pivotal contributions and offers new insights into critical military policy and decision making during the Second World War and the Cold War Praise for Architect of Air Power Laslie expertly brings into focus perhaps the least known of the major Air Force personalities of World War II and the early Cold War Kuter was the indispensable behind the scenes man in those years and this book fills a similarly indispensable gap in our understanding of the people and ideas that propelled the nation s air arm to independence and prominence Thomas Alexander Hughes author of Over Lord General Pete Quesada and the Triumph of Tactical Air Power in World War II Laslie s outstanding work on Laurence Kuter is the first full and highly effective look at this exceptionally important airman It gives the reader ample evidence of Kuter s central role in making America the quintessential airpower nation during the course of the twentieth century This will be the book on Kuter for many years to come Robert S Ehlers Jr author of The Mediterranean Air War Airpower and Allied Victory in World War II
