in the Process Industries Frank Lees,2005-01-10 Over the last three decades the process industries have grown very
rapidly with corresponding increases in the quantities of hazardous materials in process storage or transport Plants have
become larger and are often situated in or close to densely populated areas Increased hazard of loss of life or property is
continually highlighted with incidents such as Flixborough Bhopal Chernobyl Three Mile Island the Phillips 66 incident and
Piper Alpha to name but a few The field of Loss Prevention is and continues to be of supreme importance to countless
companies municipalities and governments around the world because of the trend for processing plants to become larger and
often be situated in or close to densely populated areas thus increasing the hazard of loss of life or property This book is a
detailed guidebook to defending against these and many other hazards It could without exaggeration be referred to as the
bible for the process industries This is THE standard reference work for chemical and process engineering safety
professionals For years it has been the most complete collection of information on the theory practice design elements
equipment regulations and laws covering the field of process safety An entire library of alternative books and cross
referencing systems would be needed to replace or improve upon it but everything of importance to safety professionals
engineers and managers can be found in this all encompassing reference instead Frank Lees world renowned work has been
