| 4      | Not used                                 |
| 5      | Idle stepper motor                       |
| 6      | Idle stepper motor                       |
| 7      | Idle stepper motor                       |
| 8      | Idle stepper motor                       |

### ***Auxiliary Inputs***

The following summarises the auxiliary inputs as defined in this application:

| Input | Function                         |
|-------|----------------------------------|
| 1     | Electrical load input            |
| 2     | Closed throttle input (disabled) |
| 3     | Not used                         |
| 4     | Not used                         |
| 5     | Not used                         |
| 6     | Not used                         |
| 7     | Not used                         |
| 8     | Not used                         |

### ***Tuning system***

As this engine has a single plenum and a throttle a long way from the inlet ports, the traditional MAP based tuning system is used.

### ***Special functions and control***

The ECU runs in closed loop using the standard oxygen sensor. Under high load conditions, the ECU's target AFR is set to richer than the factory oxygen sensor can measure, and hence the ECU switches to open loop mode. This allows maximum power production with adequate engine safety when required as well as running at stoichiometry at other times.

The factory idle motor was used with no modification. The Toyota stepper motor system uses a 125-step motor. There is no neutral or clutch switch on this engine, so
