Document issué du site de Greg Bender: www.kitsonfrance.com

INTRODUCTION

The Dyna III Electronic Ignition System has been designed for easy installation and does not require the use of special tools. The compact electronic module operates efficiently and was designed to clamp to a frame tube. It can be located anywhere that there is sufficient space, and does not require special considerations as it is completely vibration and water proof. The recommended location is on the left frame tube under the fuel tank.

The DYNA III System was designed for use with stock coils, however, it may be used with other coils that have at least THREE OHMS primary resistance.

PROCEDURE

1. Fasten the clamp to the electronic module using the 4-40 x 5/16 screws and locknuts provided. The clamp and nuts go on the inside of the case.
2. Remove the fuel tank. Attach the module to the frame in the location selected. Cut off excess clamp material.
