

Passage 1: Are Zoes a Good Thing?

These are hugely popular attractions for adults and children alike. But are they actually a good thing?

Critics of zoos would argue that animals often suffer physically and mentally by being confined. Even the best artificial environments can't come close to matching the space, diversity, and freedom that animals have in their natural habitats. This deprivation causes many zoo animals to become stressed. . . . Capturing animals in the wild also causes much suffering. . . . Some zoos make animals behave unnaturally. For example, marine parks often force dolphins and whales to perform tricks. . . .

On the other hand, by bringing people and animals together, zoos have the potential to educate the public about conservation issues and inspire people to protect animals and their habitats. Zoos can provide a safe environment for animals which have been mistreated in circuses, or pets which have been abandoned. From this opportunity and important research into animals the animal behaviour and how to treat them.

One of the most important modern functions of zoos is supporting international breeding programmes, particularly for endangered species. In the wild, some of the rarer species have difficulty in finding mates and breeding, and they might also be threatened by poachers, loss of their habitat and predators. A good zoo will enable these species to live and breed in a secure environment. In addition, as numbers of some wild species drop, there is an increased danger of populations becoming too genetically similar. Breeding programmes provide a safeguard: one bred animal can be released into the wild to increase genetic diversity.

However, opponents of one way that the vast majority of captive breeding programmes do not release animals back into the wild. Orphan animals are sold not only to other men but also to circuses or ... markets.

So, are you good for animals or not? Perhaps it all depends on how well individual you are managed, and the benefits of you can surely outweigh their harmful effects. However, it is understandable that some people believe engineering animals for any reason is simply wrong.

Research Anthology on Feminist Studies and Gender Perceptions Management Association, Information Resources,2022-01-21 Global society has always been impacted by the perception of gender While gender roles may differ in certain cultures many cultures around the world have allowed for the disempowerment and objectification of women Women today still struggle for gender equality whether it be professionally socially or even legally To examine feminism thoroughly however thorough analysis must be conducted on all genders and perceptions The Research Anthology on Feminist Studies and Gender Perceptions explores the application of feminist theory and women empowerment in the 21st century and the role that gender plays in society This book analyzes media representation gender performativity and theory to present a comprehensive view of gender and society Covering topics such as masculinity women empowerment and gender equality this two volume comprehensive major reference work is an essential resource for sociologists community leaders human resource managers activists students and professors of higher education researchers and academicians **Educational Policies and Youth in the 21st Century** Sharon L. Nichols,2016-07-01 As our student population diversifies rapidly there is a critical need to better understand how national regional and or local policies impact youth in school settings In many cases educational policies constructed with the goal of helping youth often have the unintended consequence of inhibiting youth s potential This is especially the case when it comes to youth from historically underrepresented groups Over and over educational legislation aimed at improving life for youth has had the negative effect of eroding opportunities for our most

vulnerable and often times less visible youth The authors of this book examine the schooling experiences of Hispanic African American Indigenous poor and LGBT youth groups as a way to spotlight the marginalizing and shortsighted effects of national education language immigration and school reform policies Leading authors from across the country highlight how educational policies impact youth s development and socialization in school contexts In most cases policies are constructed by adults implemented by adults but are rarely informed by the needs and opinions of youth Not only are youth not consulted but also policymakers often neglect what we know about the psychological emotional and educational health of youth Therefore both the short and long term impact of these policies have but limited effects on improving students school performance or personal health issues such as depression or suicide In highlighting the demographic and cultural shifts of the 21st century this book provides a compelling case for policymakers and their constituents to become more sensitive to the diverse needs of our changing student population and to advocate for policies that better serve them **GED Test**

The Myth of Achievement Tests James J. Heckman,John Eric Humphries,Tim Kautz,2014-01-14 Achievement tests play an important role in modern societies They are used to evaluate schools to assign students to tracks within schools and to identify weaknesses in student knowledge The GED is an achievement test used to grant the status of high school graduate to anyone who passes it GED recipients currently account for 12 percent of all high school credentials issued each year in the United States But do achievement tests predict success in life The Myth of Achievement Tests shows that achievement tests like the GED fail to measure important life skills James J Heckman John Eric Humphries Tim Kautz and a group of scholars offer an in depth exploration of how the GED came to be used throughout the United States and why our reliance on it is dangerous Drawing on decades of research the authors show that while GED recipients score as well on achievement tests as

high school graduates who do not enroll in college high school graduates vastly outperform GED recipients in terms of their earnings employment opportunities educational attainment and health The authors show that the differences in success between GED recipients and high school graduates are driven by character skills Achievement tests like the GED do not adequately capture character skills like conscientiousness perseverance sociability and curiosity These skills are important in predicting a variety of life outcomes They can be measured and they can be taught Using the GED as a case study the authors explore what achievement tests miss and show the dangers of an educational system based on them They call for a return to an emphasis on character in our schools our systems of accountability and our national dialogue Contributors Eric Grodsky University of Wisconsin Madison Andrew Halpern Manners Indiana University Bloomington Paul A LaFontaine Federal Communications Commission Janice H Laurence Temple University Lois M Quinn University of Wisconsin Milwaukee Pedro L Rodr guez Institute of Advanced Studies in Administration John Robert Warren University of Minnesota Twin Cities
