Global Nutrition Report 2015 International Food Policy Research Institute,2015-09-15 As we move into the post 2015 era of the Sustainable Development Goals SDGs the world faces many seemingly intractable problems Malnutrition should not be one of them Countries that are determined to make rapid advances in malnutrition reduction can do so If governments want to achieve the SDG target of ending all forms of malnutrition by 2030 they have clear pathways to follow There are many levers to pull and this report provides many examples of countries that have done so Tackling malnutrition effectively is also key to meeting many other SDG targets Good nutrition signals the realization of people s rights to food and health It reflects a narrowing of the inequalities in our world Without good nutrition human beings cannot achieve their full potential When people s nutrition status improves it helps break the intergenerational cycle of poverty generates broad based economic growth and leads to a host of benefits for individuals families communities and countries Good nutrition provides both a foundation for human development and the scaffolding needed to ensure it reaches its full potential Good nutrition in short is an essential driver of sustainable development **Seasonal to Decadal Prediction of Marine Ecosystems:**

Opportunities, Approaches, and Applications Mark R. Payne,Alistair J. Hobday,Brian R. MacKenzie,Desiree Tommasi,2019-06-28 Tremendous advances in oceanographic observing and modeling systems over the last decade have led to unprecedented developments in the nature of information available to marine science While improvements in observational technologies and networks have garnered much attention remarkable developments in forecasting the ocean have received much less focus Exploiting this new predictive skill to improve scientific understanding generate advice and aid in the management of marine resources is emerging as one of the new challenges of marine science Translating predictions of the physical environment into biological outcomes however is not straightforward Fisheries scientists for example have been trying to understand the links between physics and biology and generate predictions of variables such as recruitment for close to a century with limited success Nevertheless spatial distributions and the timing of key events which have received less focus are often tightly linked to the physical environment and may have management relevant applications The first such forecasts based on this skill are now starting to emerge This *Frontiers in Marine Science* Research Topic provides a snapshot of the state of the art in Marine Ecological Prediction It covers the opportunities for developing such

forecasts technical approaches that could be employed and examples where the technology is already being applied This body of work therefore marks an important milestone on the route to developing this new and exciting field of marine science
