Eldercare Labor Demand in China and Coping Strategies Yali Zhu, 2024-10-02 This book employs Markov models and propensity score matching methods to analyze the demand for elderly care labor utilizing data from the China Longitudinal Healthy Longevity Survey CLHLS and World Population Prospects 2022 United Nations 2022 The model predicts the health transferring scenario among the aging population firstly and then the demand for elderly care labor from 2022 to 2058 under a fixed care time demand scenario according to 8 hour working system as well as national and provincial regulations on caregiver carereceiver ratios The accelerated aging process and rapid increase in the younger elderly population will result in a rapid increase in the demand for elderly care labor for the healthy elderly until about 2042 with a 1.5 fold increase This is followed by accelerated growth in the demand for elderly care labor for the impaired and dysfunctional aging population Over time the supply of older adults without care will gradually increase nearly doubling by 2058 compared to 2022 It is recommended that on the one hand eldercare labor demand in China can be reduced from the origin by improving the health of the population and on the other hand the effective supply of elderly care be expanded by building a modern care service system improving relevant policies integrating care resources and innovating the supply model

Wagner, 2025-11-25 In this groundbreaking second edition of Learning as Development Daniel A Wagner transforms our understanding of international development by positioning learning at its core Through a compelling global lens Wagner demonstrates how education shapes both individual destinies and national futures with real consequences for income social mobility health and well being This new edition provides timely perspectives on education's role in an increasingly interconnected and challenged world The work traces international development from pre colonial times to today's learning equity movement explores how people learn across different cultures and contexts examines the intersection of education with critical global challenges including climate change migration civil conflict and new technologies and presents cutting edge research through vivid context rich examples Essential reading for students practitioners and

policymakers in education human development sociology anthropology and global development Wagner's analysis offers fresh insights into human potential for those who care about improving the lives of people across the globe **The Oxford Handbook of State Capitalism and the Firm** Mike Wright, Geoffrey T. Wood, Alvaro Cuervo-Cazurra, Pei Sun, Ilya Okhmatovskiy, Anna Grosman, 2022-06-30 There has been a major revival of interest in State Capitalism what it is where it is found and why it is seemingly becoming more ubiquitous As a concept it has evolved from radical critiques of the Soviet Union to being deployed by neo liberals to describe market reforms deemed imperfect to settle into a middle ground as a pragmatic way to describe the state assuming a role as an active economic agent in addition to its regulatory social and security functions The latter is the central focus of this book although due attention is accorded to the origins of state capitalism and how it has changed over the years as well as contemporary ways in which state capitalism may be theorized This economic agency may assume direct forms for example via state owned enterprises However it may also be indirect for example actively serving private interests through promoting insider firms who may occupy monopolistic market positions and perform outsourced state functions In turn this leads to raising salient governance questions The latter may encompass agency tensions between public ownership and political or even private interest control it may also include issues of transparency and monitoring Although state capitalism has often been depicted as the preserve of states in the global south be they developmental or predatory many forms of state capitalism are visible in mature economies be they liberal or coordinated and this is not always associated with superior governance arrangements indeed this is an area where clear and easy divisions between the developing or emerging world and the developed or mature world may increasingly be breaking down This volume brings together the accounts of leading experts from around the world it is explicitly multi disciplinary and both consolidates the existing knowledge base and provides new novel and counter intuitive insights **Effective and attractive communication signals in social, cultural, and business contexts** Oliver Niebuhr, Francesca D'Errico, Ellen Anke Schmid, Alexander Michael Brem, Anna Esposito, 2023-06-30
