2014 November Maths Lit:

Chiselled Horizons: A Multi-Cultural Approach to Visual Literacy Taina Brown,Alejandro Mieses Castellanos,2019-01-04 This volume was first published by Inter Disciplinary Press in 2016 Shaping visual literacy has been at the forefront of contemporary discourse as images have increasingly surpassed words in becoming the primary vehicles to persuade our emotions Visually encoded domains of symbols and signs inform the educational public and entertainment industries increasingly as an undifferentiated whole aided by globalizing media forces in various forms Whether top down peer peer one to many or many to many this volume attempts to derive sets of rules used to visually decode patterns present in certain media formats press cinema television and maps among others and the place of the spectator in their respective dynamics The topics discussed transition through various approaches to deconstruct mass media influences to engage critical thinking skills and ending with a collection of chapters dedicated to exploring their effects upon children and the capacity to be implemented to foster collaboration based creative learning environments

Commonsense Methods for Children with Special Educational Needs Peter Westwood,2015-04-30 This fully revised and updated seventh edition of Commonsense Methods for Children with Special Educational Needs continues to offer practical advice on evidence based teaching methods and intervention strategies for helping children with a wide range of disabilities or difficulties The advice the author provides is embedded within a clear theoretical context and draws on the latest international research and literature from the field Coverage includes learning difficulties and disabilities students with autism spectrum disorders intellectual disability physical or health issues and sensory impairments gifted and talented students developing social skills and self management behaviour management teaching methods literacy and numeracy curriculum differentiation and adaptive teaching computer based instruction and e learning Peter Westwood also provides additional information and advice on transition from school to employment for students with disabilities lesson study e learning and computer aided instruction and reflects on the important changes made within the latest Diagnostic and Statistical Manual of Mental Disorders DSM 5

How the Brain Learns David A. Sousa,2016-10-28 Apply the newest brain research to enhance all students learning Educational neuroscience consultant David A Sousa continues his tradition of translating new findings into effective classroom strategies and activities in this updated version of his bestselling text This fifth edition integrates recent developments in neuroscience education and psychology and includes New information on memory systems especially working memory capacity Updated research on how the explosion of technology is affecting the brain Current findings on brain organization and hemispheric specialization New evidence on how learning the arts enhances cognitive processing and creativity An expanded resources section More than 150 new or updated references

Time for Educational Poetics Xicoténcatl Martínez Ruiz,2019-03-19 In *Time for Educational Poetics* the author addresses a discussion in the context of today s philosophy of education and educational research Conceptually educational poetics is not limited to a theoretical construction but rather focuses on the

creative imaginative and poetic experience to being recreated in the teaching learning process Educational poetics is rooted in the philosophical and aesthetic thought of South Asia specifically in how contemplative and creative practices re introduced by Rabindranath Tagore Educational poetics is the convergence of research in creative contemplation and poetic creation practices of conscious attention and mindfulness and practices of peace education and philosophy of non violence This book leads to a perspective in thinking about the risks that jeopardize the future of young generations *Handbook of Research on Teacher Education in the Digital Age* Niess, Margaret L.,Gillow-Wiles, Henry,2015-08-03 Traditional classrooms are fast becoming a minority in the education field As technologies continue to develop as a pervasive aspect of modern society educators must be trained to meet the demands and opportunities afforded by this technology rich landscape The Handbook of Research on Teacher Education in the Digital Age focuses on the needs of teachers as they redesign their curricula and lessons to incorporate new technological tools Including theoretical frameworks empirical research and best practices this book serves as a guide for researchers educators and faculty and professional developers of distance learning tools

Studying for a Foundation Degree in Health Mary Northrop,Jayne Crow,Sarah Kraszewski,2015-07-24 Studying for a Foundation Degree in Health is designed to provide clear relevant knowledge and to support appropriate skills development amongst students enrolled on foundation degree and equivalent level courses in health and social care Combining academic study skills work based learning skills and practice focused content in one volume this is the first textbook to focus specifically on the Band 4 role of associate and assistant practitioner within the health sector Features include 13 chapters that cover the core topics students will be expected to demonstrate proficiency on by the end of their degree including health promotion healthcare delivery safeguarding quality in healthcare and research and evidence based practice Learning outcomes and activities enabling students to actively engage with their course content Content written by authors from a broad range of health disciplines including nursing radiography physiotherapy dentistry and public health accurately depicting the dynamic field of healthcare in the UK today Written by authors with a wealth of experience in running foundation degrees in health the book aims to provide students with lifelong learning skills that will benefit them while on their course during future study and in the workforce

Technology-Enhanced Language Learning for Specialized Domains Elena Martín-Monje,Izaskun Elorza,Blanca García Ríaza,2016-03-10 Technology Enhanced Language Learning for Specialized Domains provides an exploration of the latest developments in technology enhanced learning and the processing of languages for specific purposes It combines theoretical and applied research from an interdisciplinary angle covering general issues related to learning languages with computers assessment mobile assisted language learning the new language massive open online courses corpus based research and computer assisted aspects of translation The chapters in this collection include contributions from a number of international experts in the field with a wide range of experience in the use of technologies to enhance the language learning process The essays have been brought together

precisely in recognition of the demand for this kind of specialised tuition offering state of the art technological and methodological innovation and practical applications The topics covered revolve around the practical consequences of the current possibilities of mobility for both learners and teachers as well as the applicability of updated technological advances to language learning and teaching particularly in specialized domains This is achieved through the description and discussion of practical examples of those applications in a variety of educational contexts At the beginning of each thematic section readers will find an introductory chapter which contextualises the topic and links the different examples discussed Drawing together rich primary research and empirical studies related to specialized tuition and the processing of languages

Technology Enhanced Language Learning for Specialized Domains will be an invaluable resource for academics researchers and postgraduate students in the fields of education computer assisted language learning languages and linguistics and language teaching

STEM, Robotics, Mobile Apps in Early Childhood and Primary Education Stamatis Papadakis,Michail Kalogiannakis,2022-04-21 This book brings together a collection of work from around the world in order to consider effective STEM robotics mobile apps education from a range of perspectives It presents valuable perspectives both practical and theoretical that enrich the current STEM robotics mobile apps education agenda As such the book makes a substantial contribution to the literature and outlines the key challenges in research policy and practice for STEM education from early childhood through to the first school age education The audience for the book includes college students teachers of young children college and university faculty and professionals from fields other than education who are unified by their commitment to the care and education of young children

Frontiers in the Acquisition of Literacy Claire M. Fletcher-Flinn,2015-09-28 Learning to read and to spell are two of the most important cultural skills that must be acquired by children and for that matter anyone learning a second language We are not born with an innate ability to read A reading system of mental representations that enables us to read must be formed in the brain Learning to read in alphabetic orthographies is the acquisition of such a system which links mental representations of visual symbols letters in print words with pre existing phonological sound and semantic comprehension cognitive systems for language Although spelling draws on the same representational knowledge base and is usually correlated with reading the acquisition processes involved are not quite the same Spelling requires the sequential production of letters in words and at beginning levels there may not be a full degree of integration of phonology with its representation by the orthography Reading on the other hand requires only

the recognition of a word for pronunciation Hence spelling is more difficult than reading and learning to spell may necessitate more complete representations or more conscious access to them The learning processes that children use to acquire such cognitive systems in the brain and whether these same processes are universal across different languages and orthographies are central theoretical questions Most children learn to read and spell their language at the same time thus the co ordination of these two facets of literacy acquisition needs explication as well as the effect of different teaching approaches on acquisition Lack of progress in either reading and or spelling is also a major issue of concern for parents and teachers necessitating a cross disciplinary approach to the problem encompassing major efforts from researchers in neuroscience cognitive science experimental psychology and education The purpose of this Research Topic is to summarize and review what has been accomplished so far and to further explore these general issues Contributions from different perspectives are welcomed and could include theoretical computational and empirical works that focus on the acquisition of literacy including cross orthographic research

Teaching with Tablets Helen Caldwell,James Bird,2015-03-19 The presence of handheld technologies in the classroom isn t enough you need to know how to use them to enhance teaching and transform learning As more and more primary schools acquire devices such as iPads and tablets it is becoming clear that adding them as a classroom resource is not enough Teachers and trainees need strategies to integrate these into existing learning contexts in a meaningful way Without this these fantastic resources lose their value This book helps teachers to make the most of these devices in the primary classroom It offers guidance on how to use tablets to devise meaningful learning activities embed them in genuine curriculum contexts drawing upon case studies from existing practice It is written for non specialists and explains technical terms in an accessible practical way Each chapter begins with a case study contributed by a teacher using tablets in schools Real life examples and comments like this give the text a truly practical focus The book s Pinterest board includes the apps mentioned in the book as well as a handy infographic for a snapshot guide on starting off your tablet teaching journey A note from the authors The use of technology in schools continues to evolve rapidly as new devices and tools become available and the adoption of mobile devices such as iPads and tablets has been a particularly exciting development in recent years The benefits offered by these technologies such as their portability connectivity accessibility and range of media present new challenges and opportunities for teaching and learning As the take up of tablets gathers pace in our schools there is a need for advice on the best approaches and apps to help achieve successful learning outcomes Teachers need to find meaningful

ways to integrate the devices into their own practice and to evaluate which of the many thousands of educational apps might be appropriate for their pupils This book considers how iPads and tablets can be used to enhance teaching and learning in primary schools It is especially relevant in the light of the computing curriculum which puts a new emphasis on children as makers and creators of digital content Across other curriculum subjects too the introduction of mobile devices that can be quickly and reliably accessed has precipitated a shift in practice For example they have enabled teachers and children to spontaneously pursue lines of inquiry to connect collaborate and publish in many different ways and to use their digital skills to enhance their exploration of the physical world outside the classroom With these opportunities in mind we offer anecdotes from the classroom and examples of how tablets might be embedded within current pedagogy and practice as a natural learning tool Each chapter combines a practical case study with discussion of related pedagogy and recommends apps to support a personalised inclusive and active approach to teaching and learning

Research in Mathematics Education in Australasia 2016-2019 Jennifer Way,Catherine Attard,Judy Anderson,Janette Bobis,Heather McMaster,Katherin Cartwright,2020-04-20 The tenth edition of the four yearly review of mathematics education research in Australasia compiled

by the Mathematics Education Research Group of Australasia MERGA critically reviews research in mathematics education in the four years from 2016 to 2019 Its goals are to provide a reference guide for researchers and to promote further quality research in Australasia

Curriculum, Schooling and Applied Research Jennifer Donovan, Karen Trimmer, Nicholas Flegg, 2020-10-15 This book explores how teachers can navigate the complex process of managing change within the classroom The chapters highlight the new challenges that have arisen with the emergence and introduction of educational technology as teachers find themselves having to be responsive to the needs and demands of multiple stakeholders Traversing a range of conceptual disciplinary and methodological boundaries the editors and contributors investigate the tensions that impinge on research based change and how to integrate directed changes into their education system and classroom Subsequently this volume argues that posing these questions leads to increased understanding of the possible long term effects of educational change and how teachers can know whether their solutions are effective

How South Africa Works Jeffrey Herbst, Greg Mills, 2015-07-01 The overwhelming challenge that South Africa faces and has to date failed to address is unemployment which falls especially on African youths who were promised a better future after 1994 If the current unemployment challenge is not addressed it will be impossible to sustainably lift many millions of people out of poverty How South Africa Works reviews the country's major economic achievements over the past two decades Through numerous interviews with politicians business leaders and analysts it examines the challenges and opportunities across key productive sectors including agriculture manufacturing services and mining illustrative of the policy challenges that leaders face It scrutinises the social grant and education systems to understand if South Africa has established mechanisms for people not only to escape destitution but be ready to be employed and identifies steps that some of South Africa's most notable entrepreneurs have taken to build world class enterprises Recognising the essential challenge to cultivate more employers to employ people How South Africa Works concludes by offering an agenda and active steps for greater competitiveness for government business and labour

Autotelic Architect Sumita Singha, 2016-07-01 Autotelic Architect explores how movements towards more self initiated projects greater collaboration and design activism have changed how architects and designers are practicing as well as the kinds of projects they are working on Similar to the autotelic self that transforms potential problems into enjoyable challenges the Autotelic Architect does not avoid societal changes but instead learns to harness their creative potential Using new research and case studies from past and present the author analyses the educational and professional implications of operating as a non conventional progressive participatory design practice Drawing on a range of global case studies of pioneering architects in the field she reflects upon current and future trends at local national and international level and additionally examines marketing and practical issues for architects Illustrated with more than 30 black and white images this is a compelling read for any practicing architect
