Intelligent Systems for Crisis Management Orhan Altan, Madhu Chandra, Filiz Sunar, Tullio Joseph Tanzi, 2019-02-06
In the past several years there have been significant technological advances in the field of crisis response. However many aspects concerning the efficient collection and integration of geo information applied semantics and situation awareness for disaster management remain open. Improving crisis response systems and making them intelligent requires extensive collaboration between emergency responders, disaster managers, system designers and researchers alike. To facilitate this process the Gi4DM GeoInformation for Disaster Management conferences have been held regularly since 2005. The events are coordinated by the Joint Board of Geospatial Information Societies JB GIS and ICSU GeoUnions. This book presents the outcomes of the Gi4DM 2018 conference which was organised by the ISPRS URSI Joint Working Group ICWG III IVa Disaster Assessment Monitoring and Management and held in Istanbul Turkey on 18-21 March 2018. It includes 12 scientific papers focusing on the intelligent use of geo information semantics and situation awareness.

Modeling Individual Differences in Perceptual Decision Making Joseph W. Hout, Cheng-Ta Yang, James T. Townsend, 2017-01-18
To deal with the abundant amount of information in the environment in order to achieve our goals, human beings adopt a strategy to accumulate some information and filter out other information to ultimately make decisions. Since the development of cognitive science in the 1960s, researchers have been interested in understanding how human beings process and accumulate information for decision making. Researchers have conducted extensive behavioral studies and applied a wide range of modeling tools to study human behavior in simple detection tasks and two choice decision tasks e.g. discrimination classification. In general, researchers often assume that the manner in which information is processed for decision making is invariant across individuals given a particular experimental context. Independent variables including speed, accuracy, instructions, stimulus properties i.e. intensity and characteristics of the participants i.e. aging, cognitive ability are assumed to affect the parameters in a model i.e. speed of information accumulation, response bias but not the way that participants process information e.g. the order of information processing. Given these assumptions, much modeling has been accomplished based on the grouped data rather than the individual data. However, a growing number of studies have demonstrated that there were individual differences in the perceptual decision process. In the same task context, different groups of the participants may process information in different manners. The capacity and architecture of the decision mechanism were found to vary across individuals, implying that human decision strategies can vary depending on the context to maximize their performance. In this special issue, we focused on a particular subset of cognitive models, particularly accumulator models, multinomial processing trees and systems factorial technology (SFT) as applied to perceptual decision making. The motivation for the focus on perceptual decision making is threefold. Empirical studies of perception have grown out of a history of making a large number of observations for each individual so as to achieve precise estimates of each individual's performance. This type of

data rather than a small number of observations per individual is most amenable to achieving precision in individual level and group level cognitive modeling Second the interaction between the acquisition of perceptual information and the decisions based on that information to the extent that those processes are distinguishable offers rich data for scientific exploration Finally there is an increasing interest in the practical application of individual variation in perceptual ability whether to inform perceptual training and expertise or to guide personnel decisions Although these practical applications are beyond the scope of this issue we hope that the research presented herein may serve as the foundation for future endeavors in that domain

Integration as Solution for Advanced Smart Urban Transport Systems Grzegorz Sierpiński, 2018-08-25 Methods of advanced data collecting and their analysis models which help with decision problems as well as technical solutions which improve the integrity of contemporary transport systems at urban area are only some of many problems connected with integration in passenger and freight transport which have been discussed in this book The book expresses case study based scientific and practical approach to the problems of contemporary transport systems The proposed methods and models enable a system approach to assess current solutions In turn implementation proposals may support the improvement of the integrity of individual elements of transport systems and thus increase its effectiveness on the global scale With regard to the research results discussed and the selected solutions applied the book primarily addresses the needs of three target groups Scientists and researchers ITS field Local authorities responsible for the transport systems at the urban and regional level Representatives of business traffic strategy management and industry manufacturers of ITS components This book gathers selected papers presented at the 15th Scientific and Technical Conference Transport Systems Theory and Practice organised by the Department of Transport Systems and Traffic Engineering at the Faculty of Transport of the Silesian University of Technology The conference was held in Katowice Poland on September 17 19 2018

Handbook of Research on K-12 Blended and Virtual Learning Through the i²Flex Classroom Model Avgerinou, Maria D., Pelonis, Peggy, 2021-03-05 Teaching models that focus on blended and virtual learning have become important during the past year and have become integral for the continuance of learning The i²Flex classroom model a variation of blended learning allows non interactive teaching activities to take place without teachers

direct involvement freeing up time for more meaningful teacher student and student student interactions There is evidence that i Flex leads to increased student engagement and motivation as well as better exploitation of teachers and classroom time leading to the development of higher order cognitive skills as well as study skills for students future needs related to citizenship college and careers The Handbook of Research on K 12 Blended and Virtual Learning Through the i Flex Classroom Model focuses not only on how to design deliver and evaluate courses but also on how to assess teacher performance in a blended i2Flex way at the K12 level The book will discuss the implementation of the i Flex isquareFlex a non traditional learning methodology which integrates internet based delivery of content and instruction with faculty guided student independent learning in combination with face to face classroom instruction aiming at developing higher order cognitive skills within a flexible learning design framework While highlighting new methods for improving the classroom and learning experience in addition to preparing students for higher education and careers this publication is an essential reference source for pre service and in service teachers researchers administrators educational technology developers and students interested in how the i2Flex model was implemented in classrooms and the effects of this learning model

Engaging in Mathematics in the Classroom Alf Coles, 2015-07-30 What comes first class management or student engagement How can the real world be used to engage learners What is the role of technology in engaging students And is understanding or exam success more engaging In the modern world success in school mathematics can determine life chances It is therefore vital to engage children and young people in learning mathematics Engaging in Mathematics in the Classroom brings together the debates concerning mathematical engagement and draws on first hand experience and key research to promote successful classroom practice It considers what engagement looks like at different ages and the implications of this for the classroom Accessibly written with examples of successful classroom practice activities and projects the book covers Planning and managing engagement in learning Mathematical understandings and meanings Early Primary and the number system Primary Secondary Transition and geometrical thinking Secondary school Adolescence and algebraic activity Post 16 and infinity Learning across the lifespan Written by a leading authority in the field this timely text will be essential reading for all trainee and practising teachers of mathematics

Crisis Wasted? Frances Cowell, Matthew Levins, 2015-12-14 Effective risk management in today s ever changing world Crisis Wasted Leading Risk Managers on Risk Culture sheds light on today s risk management landscape through a unique collection of interviews from risk leaders in both the banking and investment industries These interviews zero in on the risk culture of organisations effective risk management in practice and the sometimes paradoxical effects of new regulations and how they affect decision making in financial organisations They offer genuine insight into regulatory processes and priorities and their implications for the stability of the global financial system As trending topics in the risk management field each of these subject areas is relevant to the work of today s risk management professionals In addition to the forward focused text this reference provides access

to a wealth of premium online content Risk management has become an area of focus for companies since the financial crises that shook the international community over the past decade but despite high levels of introspection and changes to key processes many financial houses are still experiencing large losses Understanding today's risk environment can help you improve risk management tactics Access essential information both in print and online Discover the most important topics in today's risk management field Explore interviews with 1 risk management leaders Learn about ground breaking recent innovations in risk management thinking Crisis Wasted Leading Risk Managers on Risk Culture is an integral resource for professionals responsible for minimising organisational risk as well as those who want to better understand the risk culture of today's world
