

The learner will be expected to compile a portfolio of evidence based on the research/investigation on a specific topic to depict, sell, demonstrate or advertise the topic. This portfolio will contain all the evidence on the topic that the learner could gather. This should include reports, presentations, photographs, pictures, graphs, sketches, diagrams, etc.

An example of a portfolio of evidence: Evidence of the degradation of the environment.

4.5.2 Project

The **project** will be a piece of work in which knowledge, skills and values which lead towards competence in the specific or integrated content, are demonstrated. The project requires extended reading and writing on the part of the learner. The project will involve thorough investigation into and sourcing information on a selected topic in the curriculum. This could take the form of an interview, observation and making suggestions to improve upon the topic. The objective for the project should be clear and thorough planning should take place, e.g. preparing the questions for an interview. This is followed by the research, and finally the data/ information has to be collated into evidence. The evidence will be in the form of an essay with sub-headings relating to the criteria of the task.

Although learners will spend time outside of contact time to collect resources and information, the completion of the task has to be facilitated by the teacher in class time. The topic and nature of the project will be determined by the content covered according to the annual teaching plan. Learners should be given a project before the end of the second term, after the content related to the project has been addressed, for submission during the third term. Learners will need adequate guidance at the outset of the project and progress should be monitored throughout. All assessment criteria applicable to the project has to be discussed with the learners prior to the commencement of the project.

Examples of a project:

- Community project to address a social or environmental issue
- Investigation of lifestyle choices and their impact on the overall well-being of the South African youth
- Research and apply decision-making skills to challenging situations set in different contexts: a plan of action or advice for long-term success should be provided.

When preparing a project, consider these minimum requirements:

- A cover page
- A table of contents
- Text divided into paragraphs/sections as indicated in the instructions/criteria for the project
- Pictures, photos, diagrams and graphs may be included
- Include a bibliography
- The project should be bound or stapled.

4.5.3 Examinations

Examinations of at least 90 minutes each will be administered twice a year as part of the internal examination

Genetically engineered products: Preparing for the future Patricia Machado Bueno Fernandes, Deise Maria Fontana Capalbo, Carmen Vicien, 2022-12-26 *Measuring the Evolution Controversy* Avelina Espinosa, Guillermo Paz-y-Miño-C, 2016-05-11 The reality of evolution is indisputable and based on current scientific evidence all people in the world should accept it as fact Yet only 41% of adults worldwide embrace evolution and they do it under the premise that a deity created humans One in every three people is a strict creationist who believes in religious scriptures concerning the origin of our universe and of humans and explicitly rejects that Homo sapiens is an ape when in fact science informs us that humans closest relatives are chimpanzees bonobos gorillas and orangutans Indeed we are all apes Why do people not accept evolution In *Measuring the Evolution Controversy* Guillermo Paz y Miño C and Avelina Espinosa postulate that the debate over evolution and science versus creationism is inherent in the incompatibility between scientific rationalism empiricism and the belief in supernatural causation religion and faith Belief disrupts distorts delays or stops the comprehension and acceptance of scientific evidence The authors refer to this proposal as the incompatibility hypothesis IH the conceptual foundation of this book Paz y Miño C and Espinosa explain that the evolution controversy is not only measurable descriptively but also testable as in an ordinary field of science To accomplish this they examine three predictions of IH First chronological conflict and accommodation i e the historical re emergence of antagonism between evolution and religion when advances in science continue to threaten the belief in supernatural causation in such situations creationists rejection of and subsequent partial acceptance of the new scientific discoveries are expected Second change in evolution s acceptance as function of educational attainment i e the positive association between acceptance of evolution and level of education Third change in evolution s acceptance as function of religiosity i e the negative association between acceptance of evolution and level of religious beliefs By relying on an ample assessment of the attitudes towards evolution by highly educated audiences i e research faculty educators of prospective teachers and college students in the United States the authors characterise their understanding of science and evolution personal religious convictions and political ideology The authors make recommendations for improving science and evolution literacy as well as evolution s acceptance and conclude by forecasting a probable global socio cultural landscape in which acceptance of science and evolution will take place **Ecological Reparation** Dimitris Papadopoulos, Maria Puig de la Bellacasa, Maddalena Tacchetti, 2023-12-01 How do we engage with the threat of social and environmental degradation while creating and maintaining liveable and just worlds Researchers from diverse backgrounds unpack this question through a series of original and committed contributions to this wide ranging volume The authors explore practices of repairing damaged ecologies across different locations and geographies and offer innovative insights for the conservation mending care and empowerment of human and nonhuman ecologies This ground breaking collection establishes ecological reparation as an urgent and essential topic of public and scholarly debate *New Mechanism* João L. Cordovil, Gil Santos, Davide Vecchi, 2023-12-12 This open access book addresses the epistemological and

ontological significance as well as the scope of new mechanism In particular this book addresses the issues of what is new about new mechanism the epistemological and ontological reasons underlying the adoption of mechanistic instead of other modelling strategies as well as the possibility of mechanistic explanation to accommodate a non trivial notion of emergence Arguably new mechanism has been particularly successful in making sense of scientific practice in the molecular life sciences But what about other sciences This book enlarges the context of analysis addressing the issue of the putative compatibility between the current ways of conceiving new mechanism and actual scientific practices in quantum physics chemistry biochemistry developmental biology and the cognitive sciences

Isotopic Landscapes in Bioarchaeology Gisela

Grupe, George C. McGlynn, 2016-03-10 This work takes a critical look at the current concept of isotopic landscapes isoscapes in bioarchaeology and its application in future research It specifically addresses the research potential of cremated finds a somewhat neglected bioarchaeological substrate resulting primarily from the inherent osteological challenges and complex mineralogy associated with it In addition for the first time data mining methods are applied The chapters are the outcome of an international workshop sponsored by the German Science Foundation and the Centre of Advanced Studies at the Ludwig Maximilian University in Munich Isotopic landscapes are indispensable tracers for the monitoring of the flow of matter through geo ecological systems since they comprise existing temporally and spatially defined stable isotopic patterns found in geological and ecological samples Analyses of stable isotopes of the elements nitrogen carbon oxygen strontium and lead are routinely utilized in bioarchaeology to reconstruct biodiversity palaeodiet palaeoecology palaeoclimate migration and trade The interpretive power of stable isotopic ratios depends not only on firm testable hypotheses but most importantly on the cooperative networking of scientists from both natural and social sciences Application of multi isotopic tracers generates isotopic patterns with multiple dimensions which accurately characterize a find but can only be interpreted by use of modern data mining methods

The Twenty-First Century Mechanistic Theory of Human Cognition Diego Azevedo

Leite, 2020-11-30 This book presents a theoretical critical appraisal of the Mechanistic Theory of Human Cognition MTHC which is one of the most popular major theories in the contemporary field of cognitive science It analyses and evaluates whether MTHC provides a unifying account of human cognition and its explanation The book presents a systematic investigation of the internal and external consistency of the theory as well as a systematic comparison with other contemporary major theories in the field In this sense it provides a fresh look at more recent major theoretical debates in this area of scientific research and a rigorous analysis of one of its most central major theories Rigorous theoretical work is integrated with objective consideration of relevant empirical evidence making the discussions robust and clear As a result the book shows that MTHC provides a significant theoretical contribution for the field of cognitive science The content is useful for those interested in theoretical and empirical issues concerning major theories in the contemporary field of cognitive science
